

# Financial Preparedness

In the United States really began two years ago when the Federal Reserve System was organized. It will be complete when every citizen is doing his share towards the maintenance of the system.

By depositing your money with us you can help directly in developing and strengthening it, as we are required to keep on deposit with our Federal Reserve Bank in New York a portion of your balance with us.

At the same time, and without cost, you benefit directly from the protection the system affords us.
