June Home-Furnishing Suggestions For Outfitters Of New Homes

Good Furniture Is The Cheapest In The End

Simply because some of the articles you have seen and desired were priced a little higher than you expected—don't think that you can not afford them.

The difference between furniture of quality and the kind that is made to "sell at a price" represents the lack of one or more of these essentials—material, workmanship, or finish. The money you invest in home furnishings that combine all of these qualities is money wisely expended.

Every article in our store conforms to certain ideals—either in design, material, workmanship, or finish. If it were of sub-standard quality we wouldn't show it at all.

As you go about selecting the furnishings for your home, do not overlook the importance of picking the best because the best is the cheapest in the end.

Leonard-Cleanable Refrigerator

The best insurance of fresh, clean, wholesome food is to place it in the solid operating compartment of Leonard-Cleanable One-piece Refrigerator.

We Are Not Jugglers

Our goods are not deceptive in quality. The grocer who sells unreliable foods just for the sake of making a few cents more is not a safe man to trade with. Unreliable things cannot come into this store.

We know enough about these things to know when they are pure and when they are not. It isn't wholly a question of price with us. We get the best that money will buy and then sell it with just a fair percentage of profit added.
