**No More Currency Panics**

Depositors are the shut-downs, the business depression and the lack of employment which followed the currency panic of 1907.

To prevent another currency panic the Federal Reserve Banking System has been organized to furnish the banks which belong to the system, of which we are one, so that they may at all times meet the currency requirements of their depositors.

Doesn't it appeal to you to get its protection, without cost, by becoming one of our depositors?

**We Are Not Jugglers**

Our goods are not deceptive in quality. The grocer who sells unreliable foods just for the sake of making a few cents—more is not a safe man to trade with. Unreliable things cannot come into this store.

We know enough about these things to know when they are pure and when they are not. It isn't wholly a question of price with us. We get the best that money will buy and then sell it with just a fair percentage of profit added.
