No More Currency Partics

Don't remember the shut-downs, the business depression and the lack of employment which followed the currency panic of 1907?

To prevent another currency panic the Federal Reserve Banking System keeps on hand an immense supply of currency to furnish the banks which belong to the system, of which we are one, so that they may at all times meet the currency requirements of their depositors.

Doesn't it appeal to you to get its protection, without cost, by becoming one of our depositors?

And then again they search their heads for a clear thought when after contributing \$5 worth of space to help forward a worthy cause they are asked next week to donate space in which to thank some kind person for contributing 5 cents worth of pins or a single for the same purpose. Just a thought, pass it by.

We Are Not Jugglers

Our goods are not deceptive in quality. The grocer who sells unreliable foods just for the sake of making a few cents more is not a safe man to trade with. Unreliable things cannot come into this store.

We know enough about these things to know when they are pure and when they are not. It isn't wholly a question of price with us. We get the best that money will buy and then sell it with just a fair percentage of profit added.
