

No More Currency Panics

Don't remember the shut-downs, the business depression and the lack of employment which followed the currency panic of 1907?

To prevent another currency panic the Federal Reserve Banking System keeps on hand an immense supply of currency to furnish the banks which belong to the system, of which we are one, so that they may at all times meet the currency requirements of their depositors.

Doesn't it appeal to you to get its protection, without cost, by becoming one of our depositors?
