AGRIGRAPHS

The straight furrow and the straight shot both count in winning the war.

It won't hurt parsnips to leave them in the ground, to be dug as needed.

Now is the time to put farm implements in shape before beginning to put them away for the winter.

Some Esces for seed corn: Select it; Shuck it; Store it; Shell it, with all the care you can give to the processes.

Don't forget national food pledge week beginning October 20. New York should lead the way in proportion of returns as it does in population.

When a farmer buys a Liberty Bond, he helps Uncle Sam to purchase the goods which agriculture must supply to the Army and Navy. Besides that, the farmers' money comes back to him again when the loan is repaid, with wages for the time it was working away from home.

We Are Not Jugglers

Our goods are not deceptive in quality. The grocer who sells unreliable foods just for the sake of making a few cents more is not a safe man to trade with. Unreliable things cannot come into this store.

We know enough about these things to know when they are pure and when they are not. It isn't wholly a question of price with us. We get the best that money will buy and then sell it with just a fair percentage of profit added.
