Southwest Oil and Refining Company

Capital \$1,000,000 Par Value \$1.00

J. B. Aiken, President
W. C. Jenkins, Vice-Pres.
F. H. Crawford, Sec.-Treas.

Company owns leases on approximately 15,000 acres of choice oil and gas lands in Oklahoma and Kansas.

First drilling operations will be confined to a tract of 230 acres in the proven oil fields of Carter County, Oklahoma, on which 65 wells can be drilled. The sands of this section are considered the most prolific in the oil fields of this country. Wells hold the same production month after month and prominent oil men predict they will flow for fifty years. Average depth of the present producing wells in these fields is 1,080 feet. Geologists assert there is every indication that deep oil sands also exist, and in this belief adjoining companies are drilling wells in the expectation of getting big producers at 3,000 feet. Should the companies be successful Southwestern Oil & Refining Co. property in the immediate vicinity will have an enormous value.

For the present the company's drilling operations will be confined to the shallow sands, where production is practically certain and the expense of drilling only normal. The first well should be completed within 60 days.

In order to drill 65 wells on this 230 acre lease the company has placed on the market an allotment of its treasury stock to be sold as the money is needed, at par-\$1.00 per share, and subscriptions are solicited.

We believe this stock is an excellent speculative investment. For any portion of this allotment or additional information address W. C. Jenkins, 122 E. 25th St., New York. 371f
