YTON L. EARLEY,

AT LAW

ELO O. TUCKER

"What can you do to serve me!" The secretary replies:
"That question each individual and each department of the Government must give answer." For his own department he says that every agency and every activity that could be possibly used was peeded up to its fullest degree of efficiency.

The reports of many of the Government departments are records of marvelous achievements, and the Interior Department is entitled to full credit for the part it has performed in re-shaping our internal affairs. Mr. Lane says that we have during the past year, had a glimpse of the expanding romance of chemical study." He points out that the ncrease in the capital invested in hemical industries jumped \$65,565,000 in 1915 to \$99,244,000 in 1916; and up to Septembe 1917, \$65,861,000 over the preced ng year. Strangely enough it appears to

have been accepted almost as an boolute conclusion that the United States: could not make artificia colors and dyes. But the manufacturers of the United States are now represented by over ninety enterprises, each making special olors, and one hundred concerns naking crudes and intermediates. Sulphuric acid has doubled production By-product coking doubled its capacity in the last three years. Gasoline production has increased from 35,000,000 to has increased from 35,000,000 to sional party traveled for hun-70,000,000 barrels per annum since dreds of miles, and that they 70.000,000 barrels per annum sinc creas of lines, and that they 1915. Pota h production, another monopoly of Germany, is making lutely missing. "I did not hear real headway in the United States a band play, nor sed a flag; and although the production is Lotther did I see a Frenchman small solium salts have been subsmall solium salts have been sub stituted for almost all except agriculture. Substitutes for Chilean nitrates have been de veloped to such an extent that it is now possible to produce our munitions independent of that country, if necessary. (The smeltthe metals, iron, zinc, cop per, antimony, tin, mercury, etc-

and their alloys, have increased to meet the country's need. These are but a few instances of our chemical progress. Our fur-ther advance in national development is indicated by the fact t must "know thyself." Mr. Land principles, and country's worth, we have made an appraisement, which in the language of the sec retary has led to the conviction that "in all the domains of this great country extending from the until Germany is defeated, is across the deserts and most forbiding wastes into

A Democracy at War Secretary Lane owes his posi-tion in American public life to sons they have brought home with distinction that he won in his prothem cannot help to be of im-fession as a newspaper man. In mense benefit to Congress in fession as a newspaper man. In his every day work he has the happy faculty of enlivening the with bright, sparkling gems of literature. Perhaps the finest tribute ever paid to "Old Glory" was Mr. Lane's Flay Day speech had several weeks ago there was in 1914. The same "punch" and a feeling that many of the mem-

sould sight for it at and operate the N. V. 4. Per reliable in its normal line of life."

1837a Mr. Lane. "And the file is normal in associated Press dispatch of the more of per because it desired in associated Press dispatch of the more of the institutions. It takes time to accustom men to the short, hard words of the life in the scrap heap, to command, and to the surrender of personal liberty. It is not easy. personal liberty. It is not easy, either, for a nation to turn its back upon the conception of a world where justice works out its ends by quiet processes, and in its stand cume to the atern bebattle field. So if there is wrenching and side-slipping and con-fusion there should be no surprise. The surprise to me has een with what comparative case the transition has been made and how much unconscious preparation for the new work had al-ready been made. Now, that our problem is to produce more than ver before, it is clear to be seen that the physical resources of the United States are to-day almost completely at the demand of the world's needs."

Vivid War Stories

Congressmen Johnson and Dill, of Washington, gave a very vivid acount of their experiences the battle fields of France, to a nody of newspaper men a few evenings ago. The Congressmen evenings ago The Congressmen were taken into the first line of trenches, and one of them described the proximity to the enemy as "about the distance between second base and the home plate." The enemy discovered The enemy discovered their presence, and the legislators were under fire, and mighty lucky

37r. Dill drew a realistic picture of the scenes along the battle fronts. He told how the congresne had asked the question in France: "Where are your young men!" The answer was: "Our boys of twenty-one look as the thirty look as the they were

fifty."
"The shadow of the funeral is on every woman in France," ob-served Mr. Dill, "but in our travels by day and night, when-ever we reached a gate or a bridge that had to be opened; the attendant was always a woman."
The women," he added, "are baring the burdens of the war. and in all France there is not a the must know thyself. Mr. Lane and in an treate there is not a defines this policy as sound person who has any thought of Americanism; and in this suprem giving up the struggle. The conviction and knowledge of our trench fight always," he said principles, and country's worth, and notwithstanding his belief that the nation has reached. its aghest point of fighting effinency, and is in a weakened condition to continue the struggle trong a determination now, as in the beginning.

the far Arctic, we have come to the congressmen have had won-believe that there is no land that derful experiences, and it is for-tunate that a group of them have actually been at the front, and the present session.

The Return of Congress in 1914. The same "punch" and a feeling that many of the memilit is correctly stated, at least as really miles from Andover on the characterized the famous tribute their constituency. But now it to the "Makers of the Flag" is to stifferent. More than five hunting the found in the secretary's words dred men in the two branches of the propose to follow him, treds; other good out buildings. Concerning our country's part in pulse" of the people; and they propose to follow him, treds; other good out buildings. "A democracy making war is a feeling that many of the memilit is correctly stated, at least as FOR SALE—108 acre. Farm the sentiment, of the sentimen
