but is should be distinctly understood that the League is not in taxor of selling good producing gram. Disappointed With Low animals for beef. If the poor Prices, But Adopt Resolution cows are sold it may not be necessary to get rid of the good ones are structure situation is now even the the war is prolonged. Dairy Adopt Constructive

A very serious situation is now confronting the dairy interests and the production of food. There is a temporary large surplus of milk, due chiefly to lack of ships and other war conditions. This is a movement that surplus has made it necessary to reduce the prieg of April milk below the cost of production and this reduction may result in a string reduction may result in a divertising is being done while advertising is being done while advertising is being done while after the reduction may result in a divertising is being done while still larger decrease of dairy cows which is already under way.

Farmers operating on a small or borrowed capital cannot long key their heads above water doing as a food.

The use of more milk and butters of the district committees are consident that a conditions soon become

market conditions soon become
more hopeful there is certain to
be a serious milk famine laster.

However, those who are in
close touch with the milk situation agree that market conditions
for milk and its by-products will

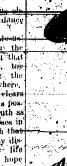

formilk and its by-products will

going improve As soon as none of milk more of milk per day than for milk and its by-products will soon improve. As soon as enough ships become available European demand for milk products will more than take care of any surplus. Therefore if a constructive program having the backing of both city and country people can be agreed upon so that temporary constructive program is constructive program by the fact that the perfecting of better local to the cows so that an adequate the cows so that an adequate supply of milk and dairy prothe cows so that an adequate fivers are being impressed with the cows so that an adequate the fact that the real management entry ducts may be had in the futures the fact that the real management control and power of the organization rests with them, and on the theorem.

At hundreds of branch and principle of each individual members of the Dairy ber and local branch assuming its share of responsibility and direct share of re men's League, resolutions have share of responsibility and directive share of responsibility and directive program adopted to help the situation. A few of these resolutions and features of this program are:

(1) A nited effort to increase the consumption of milk and milk products while the surplus lasts. A compaign is under way their to the attention of city people the great food value and comparative cheepness of wilk-butter and choose. A dairy extended the present time, this would keep 2500, 40 of came per day from the market which would have an appreciable effect upon the milk surplus. omnipaign is under way to have an appreci

It is also a fact that many dairymen are using due to the exclusion of their own product, hatter. Hundreds of resolutions have recently been adopted at famours' neetings urging darmers to use butter in place of clee and to use hutter in place of clee and to use more milk in their cless describly at the present sind white there is a surplus of the

THIRD BIG LOAN DRIVE NEARS Work of Organization Speeding

> Up as Local Committees Perfect Their Plans. FARMERS WELL REPRESENTED

Men Affinated With Agricultural Or ons Come Forward to Help Town and Village.

Work of organizing for the thir-Liberty Loan campaign is going for ward rapidly in each of the eight districts into which the New York Fed

their respective unstricts is once put into full operation every foot of territory will be covered.

Members of the district committees have been making a thorough canvass of each county pickling out ment to serve on local committees and outlining the work to be done. For the most part, the unit who correct on the large part the tien who served on the local committees during the last loan baye been reappointed, but many new mem-bers have been added. The latter, as a rule, have been chosen with a view at establishing a closer and more harmo-

nous reauton between the leading in terests of a community and the local committee. The agricultural interests in particular will be widely represen-ed not only on the local committees, but the district committees, by mer but the district committees, by mer who are either practical farmers or closely affiliated with the leading farm organizations.
In the larger centers of population
