Effective January 21, 1919

In accordance with the order of the Postmaster General, dated December 13, 1918, new schedules of rates for telephone toll calls (to points outside the local servic; area) under which all toll calls thruont the United States are placed on a uniform basis, became effective 12.01, a. m. January 21, 1919.

Under these new schedules the "station to station" rate is the base rate upon which all rates for the various classes of service offered, are computed. This rate is determined by the air line distance between toll points and 13 computed, for the initial period, on the basis of 5c for each 6 mlies up to 24 miles and 5c for each 8 miles beyond that distance.

For toll calls where the calling party does not specify a particular person to be reached at the the called telephone, the "station to station" rate is charged. This method provides the cheapest and quickest form of telephone toll service.

For toll calls where the calling party specifies a particular person to be reached at the called telephone and the connection is established and conversation held with that person, the "person to person" rate is charged. As this service requires a greater amount af operating effort, the rate for such calls is about one-fourth greater than the "station to station" rate, (minimum "person to person" rate 20c.)

For toll calls on a "person to person" basis, where the calling party, in placing the call, designates a definite time at which he will talk and the conversation is held, the "appointment" rate is charged. As this service involves the making of the appointment in addition to the operating effort necessary for a "'person to person" call, the "appointment" rate is about one-half greater than the "station to station" rate. (Minimum "appointment" rate 25c.)

In connection with all toll calls other than those made on a "station to station" basis where the connection is established but the conversation is not held, beause of any reason beyond the control of the telephone company a "report charge" is made equivalent to about one-fourth of the "station to station" rate. (Minimum "report charge" 10c., maximum \$2.00.)

Reduced rates, applying only to calls made on a "station to station" basis are quoted for tell service between the hours of 8:30 p. m., and 4:30 a. m. The rate between 8:30 p. m. and 12 midnight is about one-half the "station to station" day rate, and between 12 mid-night and 4:30 a. m. about one-fourth the "station to station" day rate. The minimum night rate is 25c. Where the "station to station" day rate is 25c. or less no reduction is made for night service.

> This does not change the rates for, of the handling of, calls within the local service anea.
