> This is the test that decided many thousand truck operators to buy Stewarts. They are used by more than 200 lines of business in 27 countries, meeting every hauling requirement in every climate and condition with satisfaction and economy. Ranging from the light 34-ton truck to the powerful 31/2-ton size, they answer every truck hauling problem. Stewart advantages are so marked that some truck operators have disposed of their old fleets completely, replacing them with Stewarts. They saw that Stewart transportation would quickly repay in better service at lower cost the loss they sustained in selling the old fleets at used-truck prices. You, too, can profitably adopt Stewarts. Once a user you will always want Stewart reliability. -
