What we would, expect from the lips of the One who recognized His responsibility to the hu-iman problem and was obedient to vision, has become the working program of those who react humanly toward the human family. If religion is not vital to the social problem it is vital for nothing. A cave-man placated his gods, made oblations and sought fetich against dreads. An intelligent man in these days has no dreads, no thumb-biting, angry deity to placate, no pre-arranged hell to fetich against. An intelligent man assumes a God as intelligent as the

man himself! What does complicate the problem the fact that few can lift above the cave-man ideals. All social and political wrongs, tyranies, brutalities, i oppressions, classisms, clannisms, na- 🗄 tionalisms and economic wrongs, and individual infraternity are done in every instance by selfists, the direct descendants of the cave-man. The Breed of Brothers do not do these wrongs because they are brothers. Jesus demands His friends to qual-

ify as brothers. How otherwise? They demonstrate qualification by reacting to the human problem conetructively, friendly.

Tean threshing depends on keeping the cylinder revolving at normal speed requires ample, dependable power. Maximum power depends on proper lubrication.

The normal operating heat of a tractor engine is inevitably high, and the partial condensation on cylinder walls of the heavy fuels commonly used on tractors adds to the difficulties of lubrication. Therefore, tractor engines require a special oil which will resist this decomposition and diluting action of heat and fuel. Unless the lubricant maintains its body under these condi-

tions, it will fail to give maximum pro-

tection against wear. Socony Tractor Oil is manufactured especially to meet these requirements. Use Socony Tractor Oil and Socony Oils, Greases and Fuels. They will keep your tractor working at fullest efficiency and economy. Sold where you see the

No more getting up to kindle fires. No more coal scuttles to fill or ashes to carry, and no more soot. All the drudgery that makes kitchen hours drag, abolished. The New Perfection Oil Cook Stove gives full cooking heat the instant the neatch is applied.

The long, blue chimney on this stove concentrates the flame and gives just the proper draft for perfect combustion... At the same time this chimney drives all the heat directly to the spot where it does the most good. A special feature of the built-in oven cook stove is the heat-retaining oven. Give it thirty minutes of quick heat—close the damper and turn the burner off. All the heat is retained in the oven until the food is to be served.

The New Perfection Oil Cook Stove has 3,000,000 users. It comes in 1, 2, 3 and 4-burner sizes.
