New York's Affred Allumni
Alfred, March 23.— Returning
Mentlay from New York President
Buothe C. Davis from P. E. Titsworth and Prof. Charles F. Binns report that the annual banquet of Alfred's New York Allumni was a
thoroly enjoyable affair, quite the
finest they have yet held and altho
its butward tone might be characterized as business-like, there was an unized as business-like, there was an un-dercurrent of enthusiasm running high for the Alma Mater. The banquet was held in the ball-

The banquet was held in the ballroom of the Park Avenue Hotel with
exactly one hundred and fifty-one
guests present. Decorations included Alfred flags and banners huns
about the walls and for fable cenpars,
red rose buds and asparagus ferns.
The menu was all that could be desired and the most any normal person dreams about, just one delectable
dish after another. During its serving there were many reminicences exchanged and old fiftendship renewed.
The Glee Club had arrived gafe
and sound after it for a varied age.

\*\*Cesses and the boys lent a festive tone
to the gathering with their rounding
souns.

BLISTERING SUMMER
IS NOW PREDICTED
Local weather sharps who watch conditions each year at the time of the spring equinox make the declara-In spring equinox make the declara-tion that the coming summer will be one of much heat. They hase their observations on the direction of the wind for March 19th, 20th and 21st. On the 19th it came from the south and was warm. On the 20th it was from a southerly course all day ex-cept for a brief period when it veered to the southwest.

cept for a brief period when it veered to the southwest.

The first peepers were heard in concert Sunday evening, but the old imers say that the peepers have to be frozen up three times before pring is really on hand in carnest. An unusual amount of lightning has accompanied the March rains, the resent record being one believed to recent all recent years. All of March so far has been in singular ontrast to the usual run of weather or this month, when in years past ome of the most boisterous weather of the winter has been encountered.

### Keeping Water Cool.

Keeping Water Cool.

The only way to keep water cool is to surround it with some material that is a bad conductor of heat, or in other words, does not pass on the heat too rapidly. The poorest conductor of heat, is a-vacuum or space from which the air has been excluded, hence. In thermos or vacoum flask makes the pest container for cold water. Other bad conductors of heaf are wood, leather, felt, horn, hone; containers made of or coyered with these naterials will keep liquids cooler than noise made of metal or glass.
