

They Work While You Rest

Industrious dollars busily engaged in turning out more and more dollars, never slowing down but always keeping up at the same speed—what a wonderful dream.

But it is no dream. It can be made a certainty if you will only set them at their task. You alone can do that, for dollars will not voluntarily sentence themselves to hard labor. You must start them out and keep encouraging them.

The best method of encouragement is to give them friends. Dollars are extremely sociable and if you keep adding more dollars to your account they will fairly outdo themselves in productivity.

Lonesome dollars get few results, so keep adding new ones to your account. The more they work the more you rest.
