GOES TO WELLSBORO

C. B. Richardson Purchases Hotel in That City. Goes From Galeton

One of the most important transactions, so far as Wellsboro is concerned, in years was the sale Thursday for \$25,000 of Cole's Hotel to Clark B. Richardson, of Galeton, who will spend as much more money in making a modern up-to-the-minute tavern. Mr. Richardson has achieved the reputation of being one of the best landlords in Northern Pennsylvania. He will be ably assisted by his wife and her mother, both long experienced in hotel management. They make an invincible team. The name of the hotel will be changed to "The Wellsboro Inn." In his venture Mr. Richardson has strong backing of Wellsboro capitalists who have long felt that the hotel accommodations at the county seat were not what they should be, mainly for the reason that new blood and liberal investment in modernizing the structure were much needed, which the former management did not care to supply.

Wellsboro on the completion of the concrete road to Mansfield to connect with the "Susquehanna" trail, which should not be later than August 1, will be a station on the great concrete highway from the west to Harrisburg, Philadelphia, Baltimore and Washington. It will be also one of the main stations on the primary county seat highway system now under construction, connecting all the capitals of the Pennsylvania north border counties, and as the legal and financial center it is worthy of the hotel that the friends of Mr. Richardson predict he has the ability to make and maintain. Wellsboro is enthusiastic over the coming of the Richardsons. — Philadelphia North American.

You Can Prevent Most Chick Losses

The too frequent heavy death rate among chicks during the critical breeding period is one of the heaviest drains on poultry profits. Baby chicks are expensive—every one that dies is a real loss that can't be made up. It's better to raise the chicks you have than to replace them with others. There is no reason why you should not grow to maturity practically every good chick you hatch or buy. The secret lies in the feeding from the first meal the original "baby food for baby chicks."

Pratt's Buttermilk Baby Chick Food

It completely nourishes the chicks, resulting in quick, even, healthy growth and development; carries them safely over the dangerous first few weeks. Chicks eat so little during the first six weeks that the slight extra cost of the perfect chick food, the original "Pratt's", is next to nothing. It is made up many times by the value of the extra chicks saved and the extra value of every chick raised.

Feed them Pratt's Buttermilk Baby Chick Food. If it doesn't please you—your money back.
