**NEWSPAPER A SERVICE**  
Sometimes community newspapers are criticized because they miss good news items. The reason is not that the editor doesn't want the news, but that he is unable to get out and get the news because of the countless things he has to do. Not until the publishing of a country newspaper has been made sufficiently profitable so the editor may hire competent persons to relieve him of the mass of detail he must now handle, can community or publisher hope to make the paper what it should be. A community newspaper is not a thing; it is a service. A telephone rental at \$15 or \$20 a year is not considered excessive. But, in service rendered, does the telephone surpass the newspaper?
