

THE House of Never

Is the goal actually reached by many people who really intended to open a Bank Account "Someday" when conditions got better, when they would have more money and not so many places in which to use it. They did not realize that opportunities to spend grow with income. In other words Thrift and Economy work for and with the man who sees and seizes the fact that even a small growing account NOW means a larger account and larger opportunities for accumulation later on.
