

FARMING IS A BUSINESS

It is the biggest business in this country and the farmer must have a knowledge of buying, selling, shipping, as well as skill in management.

Then, there is the financial side of farming.

Any information that we have at hand on markets, business conditions, methods of managing farm work or safe plans for farm money matters, are at your disposal.

Our experience in the past has been in large part with the farmer. This experience may be valuable to you in your farm work. It will be important to you only as you make it useful.

DISTRIBUTES EXPLOSIVES

Government Announces Plan For Use On Farms

The United States Department of Agriculture has made announcement that the Picric Acid left on hand at the close of the war will be made into six-ounce cartridges and sold at cost for farm and highway improvement work.

Each state has been allotted a definite amount. New York is to have 312,000 pounds. It will be packed in 100-pound boxes. Each 6-ounce cartridge is equivalent in strength to the ordinary 8-ounce dynamite cartridge. It is also considered a safer explosive to handle.

Arrangements for distribution are being made thru the County Farm Bureaus. In order to get this material it is necessary to assemble carload orders. No landowner will be allowed to have over 1000 pounds.

Farm Bureau Manager Raymond states that he has already received many inquiries about the explosive, and that as near as possible he will direct to Allegany county about 90 per cent of the quantity.

It is noted that the explosive is being distributed in 100-pound boxes, and that the cost of the explosive is about 90 per cent of the cost of the dynamite.
