

### We Speak For Your Patronage

While serving a great many people in this community, we speak also for your patronage, not because we do the best we know how for you, but because we know how to do the best for you.

You need good bank service every day — twelve months every year. Also you want to be in line for services out of the ordinary when your interests require such service.

You will find here your ideal of bank service, and a bank that every year you'll like better.

FOR SALE—Two Single Harnesses with extra hames and traces. Michael Folsing, Harness Shop, Center St. 41.  
Valuables Left in Pockets.  
"A tailor's site is one of great temptation," said the man who runs a clothing pressing and repairing establishment on upper Broadway. "Few people realize how many valuables and the quantity of currency come into a tailor's possession through the negligence of his customers. A man sending his suit to the tailor just does not seem to be able to remove everything from the pockets. In the last year I have found everything from an indorsed check for \$500 to a bottle of a once common beverage. Among other things that have come into this shop in the pockets of men's clothes in the past year are currency, police passes, stocks, bonds and other valuable securities, enough cigarette cases to start a shop of my own, matches, boupaus, handkerchiefs, fountain pens, pencils, fraternity pins, lodge buttons, wallets, card cases, watches, knives, and scores of other such articles which men commonly carry."—New York Sun.

Concrete Boats in Italy.  
Some years ago there was first broached the question of using concrete for shipbuilding, and since that time these have been many successful and practical applications of this idea. Indeed, the inventor Gabellini has succeeded in inducing the Italian government to adopt it for certain purposes connected with the navy. These boats have double skins and water-tight compartments, and being craft of about 100 tons each, are able to withstand shocks by collision to a surprising extent. Their draft is little more than that of wooden vessels of the same size. A special advantage is that they neither rot nor rust, and they are easily kept clean. Many canal barges of the same material are in use in Italy; and concrete has been found particularly well adapted for the constructing docks and caissons.

Great Portrait Painter.  
Gilbert Charles Sparr was an American portrait painter, born in Narragansett, R. I. in 1764. He became the protégé of a Scottish painter named Alexander, whom he accompanied to Edinburgh, but was so struck by the death of his patron, and for some years led a wandering life in London and America, till his great gift as a portrait painter was recognized. He returned to America and painted portraits at Washington, New York and other notable American cities. He died in 1822 and is buried in one of the tombs in the old burying-ground in Boston, Common-wealth Avenue.
