We want to give you as much value in those things as can be given.

It's good business for both of us; you make money, and by giving more than anyone else and taking smaller profits we bring greater business to this store. We make some money, too, not on one sale, but on the long run of sales.

The "Clean-up Squad" including representatives of the U. S. Veterans' Bureau, the American Legion and the Red Cross, was in Hornell Saturday and Monday and in Wellsville Wednesday to aid ex-service men in securing action on claims they may have against the government. These claims include back pay, vocational training, compensation, allotments, insurance and medical care. A medical examiner and a compensation and pension examiner was included in the squad so that all claims could be given immediate attention.

These squads have been organized all over the country by the U. S. Veterans' Bureau, which is the new department combining the work formerly done by the Board of Vocational Education, the Board of War Risk Insurance and the Public Health Service. Its purpose is to "clean up" all disabled ex-service men unaware of the opportunities of rehabilitation offered them by the government and also to men whose disabilities are just now becoming evident.

The Wee Play House program, which was to have been given December 1st, has been postponed until after Christmas. "A little two" of the plays were to be repeated from last year, it was found that so much of the cast would have to be changed that it would require as much practice as new plays.

About a fourth of the students were unable to get home for Thanksgiving, and so spent the vacation in town. The persistently rainy weather made hiking unpleasant, but the party at the Brick Wednesday night and at Miss Laura Stillman's Friday night together with the movies Saturday night helped to pass part of the time which was not used in making up class or laboratory work. Then too, the Christmas vacation is only a little over three weeks off and every one will be going home then.

Mrs. Mix gave an interesting report of an address on "The Necessity for Classes for the Correction of Speech Defects" and one on "Well Spoken English - Peppercorn." Many examples were given of boys and girls of the ages who had been aided by technically trained teachers. Even middle-aged people have been cured of stuttering, lisping and other defects. Children can be saved from defective speaking, if their parents and teachers watch closely to correct errors while the children are still young. The need of standard correct English pronunciation was also stressed.

Experiment Station Warns That Italian Seed Will Winterkill

The Seed Analyst at the Geneva Experiment Station has issued a warning that large quantities of clover seed from Italy and other parts of Southern Europe have been placed on the market and that this seed is not adapted to New York conditions, but will winterkill completely. It is urged that farmers purchase only seed known to have been grown in America.

From July 1st to October 15th, it is estimated that 1,876,600 pounds of

Widespread distribution of seed of Italian origin will mean a disastrous loss of the clover crop even where the clover goes into the winter in good condition. Far-seeing seedmen will appreciate this fact and will take every precaution to protect their customers against a loss of this kind. Wholesale dealers should steadfastly refuse to buy imported seed even though it may be more easily obtained or cheaper than American seed. Local dealers should require a guarantee from the wholesalers that the seed is of American origin. Neither the seed dealer nor the farmer can afford a complete loss of a clover crop due to inferior seed.

Imagination and Inspiration in the Intimacies of Glove Silk

On a summer's day Ages of ago, the young Empress, sitting Chl dreamily at posting in discount of her royal robes. Just outside her "jacouse" was a wind-swayed mulberry tree, on a leaf of which a cocoon lay. Curiously in the Empress' attire! Kby, faintly she reached forth and broke the white silken seal of the cocoon and its silvery filaments disclosed "At last—at last," she cried, "something new! For me shall a robe be woven of these moonbeam threads that will be unlike and outshone all others in splendor."

Slaves in retinue of thousands carried out her majesty's imperial whim—and so—the secret of silk was born.
