SAYS G. O. P. LEADERS ARE BECOMING BONEHEADS

George Henry Payne in THE FORUM Declares Their "Gelatinous Headpieces are 'Stratifying'."

One hears a good deal in New York about the fact that the balance of power in the Republican party is shifting from East to West and into the hands of radicals. Is it any wonder? Usually it is assumed that the defeat of a political party has a chastening effect, that it purges the organization of mistaken ideas and unhealthy leadership. Apparently, however, in the East the scorching defeat of November has only had the effect of stratifying the gelatinous headpieces of the Tory leaders who previous to the election believed that the masses of the people were against them, but who now are able to prove by means of the election returns the glorious fact that they were right and that there is no longer any question but that the mass of the votes are against them.

On election night we sat in the company of a distinguished United States Senator for whom we have unbounded admiration and a positive affection.

For a year he had listened with an amused smile to our pleading that he change his course and beware of the rapids below. As colleague after colleague of the distinguished Senator went over the rapids on election night our friend the Senator firmly grasped the tape that clicked in the doleful news and bitterly exclaimed: "Who would have thought it?"

The humor of the situation never

seemed to dawn on him that practically in every section of the country hundreds of thousands of American citizens, men and women without any influence except that which comes from having a single vote had all "thought of it," and that apparently the only body of men in the United States who had not grasped the situation and understood the public temper were the members of the Senate and the House of Representatives, and the so-called "leaders of the party," which leads us to observe that if there is one place in this country that a man should not expect to find accurate political information it is in the city of Washington, D. C.
