"Modern criticism increases the moral power of the Bible by humanizing it. Here is a great literature whose deepest and best influence has been marred by the false position forced on it. The Bible has been treated as an artificial book. Its authors only seemingly alive. A wall has been built between it and human life. It has been dissected into texts till its human spirit has almost vanished. Formerly, the Bible wielded a power based on the outward authority ascribed to the book as being a direct verbal revelation from God, whence also the artificial treatment of it as a hand-book of doctrine. No doubt this external stamp of authority gave it power, but not the best power. Its true authority is its appeal to the human soul. The divine that is in it approves itself most perfectly when it issues from true human souls capable of manifesting the divine. Criticism helps us to see in the Bible the souls and words of real men."

We welcome YOU to all the services of OUR church.
