HOW'S YOUR INSURANCE?

Only the well-insured are safe. A man who cares nothing for in-
surance, cares little for himself and less for his family.

There are five kinds of insurance — and then one more.

The five are life, health, accident, fire and burglar. You know
much about these, for insurance companies and solicitors have seen
to that.

But do you know as much as you should about the "one more" —
about the sixth, which should come first?

This sixth, or first, insurance is the insurance against disease,
wretchedness, inconvenience.

The only way to insure against such things is to live in houses that
are perfectly sanitized, heated and ventilated.

Perfect plumbing, perfect heating and perfect ventilation form the
best health insurance ever invented. And to have health is to pro-
long life and reduce accidents.

Then, too, good plumbing is a kind of fire insurance.
