Agrigraphs

Proper feeds and feeding are the best "poultry tonics".

Uncle Ab says: The strangest thing about common-sense is that it isn't common enough.

There are no "thoroughbred" cattle; this term is properly applied only to running horses. Say "pure-bred".

Do you grow beans? Do boys bother them? Get a copy of bulletin E 58 from the state agricultural college at Ithaca.

Trade increases the wealth and glory of a country; but its real strength and stamina are to be looked for among the cultivators of the land.

One farmer has found that rats may be destroyed by piping the fumes of an automobile exhaust into their burrows under barn, garage, or chicken house. He packed earth around the hose and ran the engine moderately for ten minutes.

A spoon used for turning broiling meat will save it from the fork pricks that make it dry an dinsipid.

The cellar needs a spring tonic more than folks. It should be applied with a broom and a strong arm.

A few flowers where you can see them from the kitchen window will do a lot to brighten the day's work.

Let the wind work for you. Draperies hung on the line in a stiff breeze will be freed from all dust. Of course they must be strong enough to stand this.

If the baby gets lively and spills the ink bottle on the carpet, pour salt on the spots immediately. Keep putting more on till it ceases to become discolored and then wash with clear warm water.

The home town paper is more than paper and ink—it's a part of your community life. The State College of Agriculture at Ithaca has a bulletin on the country weekly. Ask for F 155 if you'd like a copy.
