

Young People's Checking Accounts

WE always encourage young people to carry checking accounts with us because we know that:

It trains them early in the art of handling their money to best advantage;

It identifies them with a reliable bank and lays the foundation for future credit;

It gives them a keen interest in their financial growth

A Bath a Day

For six hundred years the Romans used no medicine but the bath. Is that strange? It shouldn't be. The secret is very simple. You see the Romans bathed daily. And people who take a bath a day rarely, if ever, need medicine.

A bath a day keeps the pores of the skin open. This makes it easy for the skin to breathe. Skin breathing sanitates the body.

Then, too, a bath a day stimulates—exercises—lubricates, you might say—all your internal organs. This stimulation keeps them working as they should.

When the organs are working properly, they are healthy. Healthy organs make a healthy body. And a body that is healthy does not need medicine.

But that isn't all. A healthy body is a builder of beauty, energy, efficiency and happiness.

If you would know the joy of health and beauty start the bath a day habit. And there is no better time than in this month of June.

All you need to make the start is a little will power and a good bathroom. You supply the one and we will supply the other.

Start a bath a day to-day, keep it up, and the money you have been paying for medicine will pay for a bathroom several times over.
