LADIES FIRST?

In spite of ways that often vex and even oftener perplex, I greatly love the female sex. I love their eyes and hair and noses. I love their figures and their poses. Yea even when they're older grown and outward charms have partly flown, I love them for their tenderness and all their gentle wisdom bless, but when at theater or bank where people stand in single rank, all waiting in a line, by heck, to buy a seat or cash a check, some woman busts in out of turn, my angry passions rise and burn. If she would cease to jam and squeeze and come and ask me pretty please, she'd likely get my place in line and almost anything that's mine, but cheating all us waiting men I hold it something else again. If any man should be so cowardly the rest would likely treat him rowdy. We'd grab the same and punch him good and make him act the way he should. O lady thou'rt fair and sweet, thou form and face have Venus beat, so that your beauty none may spurn, but still pray you wait your turn. Although you often hear rehearsed the well-known motto "Ladies first," you'll get more favors from the panted if you don't take too much for granted, and still when youthful beauty fails, you'll be respected by the males.

BUILDING—do you buy permanence?

IT COSTS but little more at the start than temporary construction. Over a period of years it means dollars in your pocket—for the upkeep on temporary building costs more than the building itself in the end.

Your building material dealer has seen the growth of permanent building—has done much himself to help it. You can save money by following his advice as to methods of construction and brands of material.
