Both legs were crushed off just below the knee. Mr. Stephens was standing on top of a car filling the end containers with ice when a switch engine pushed another string of cars against the car that were being filled with ice.

**CHURCH SCHOOL PLANS**

Board of Education Allows School Children To Attend.

At a recent meeting of the local Board of Education, the petition of the Community Council of Religious Education was approved, whereby children with the request of their parents may be excused from public school for one hour each week to attend classes in religious instruction in the Interdenominational Community Week-Day Church School.

The classes and curriculum of the Week-Day Church School will follow the plans as announced, with a few minor changes.

All children, not attending elsewhere, are invited to enroll at once, that the registration may be completed immediately. The classes, both for the grades and the High School, will be held on Thursday throughout the year, using the rooms of the Methodist and Presbyterian churches as class rooms.

The parents of the pupils enrolled are urged to lend their support and interest that the work of the school may be successful.

**COME!****Shiver and Shake**

That's what a lot of people do—shiver and shake—the day the first cold snap arrives. And they will shiver and shake all because they forgot—put off, neglected, waited—to have their heating plants put in order.

It's a poor plan to buy a lock for the garage after the car's been stolen. And it's just as poor a plan to wait until cold weather to have your heating system tuned up for winter.

People who care about their health go to a doctor at least once a year and have him examine them.

Your heating plant needs the same kind of examination. You know the old saying, "A stitch in time saves nine."

Have your heating plant looked over today. At the same time have a heat regulator put in, and save enough coal to pay for it.

Winter will soon be here. This is the last warning. Have your heating system put right—right now—or expect to shiver and shake.
