HELPFUL HINTS

Vines.—A glass receptacle is the best thing that can be used to grow seeds and slips in, as this allows the sun to get at their roots.

White Leather.—To clean white leather bags, belts, etc., use oxide of zinc.

Corn.—An easy way to remove silk from corn is by using a vegetable brush.

Birds.—If your canary refuses to take his bath just sprinkle a few seeds on top of the water, and he will be drawn to his tub.

Trouble Savers.—A pile of newspapers kept in one corner of the kitchen will save much trouble if used to set soiled pots on.

Milk.—It is said that if milk is heated until it is lukewarm and then suddenly cooled there will be much more cream.

Peach Stains.—A peach stain is very difficult to remove. It may be done, however, if these directions are followed. First wet the stain thoroughly, then spread cream of tartar on it. After this wash in the ordinary way. It will probably be necessary to repeat the process if the stain is very old.

Frying Eggs.—Put a spoonful of flour in the pan in which eggs are to be fried. This will not only keep them from sticking, but from breaking as well.

Stuffed Eggs.—When eggs are to be stuffed they should be put in cold water as soon as they are taken from the stove. This will keep the whites in better shape.

Sandwiches.—Sandwiches may be kept as fresh as when first made if they are wrapped in a napkin wrung out in hot water and then put in a cool place.

Toilet Water.—A simple toilet water may be made by putting two ounces of elderwater and distilled water together.

Porcelain.—Porcelain-lined tubs and sinks can be easily cleaned if a cloth (preferably flannel) wet with kerosene is used.

A For Sale ad.—written with some selling-sense in it, will sell the used thing or something like that.
