Uncle Ab says: One of the best ways to get men to work harder for you is to work harder than they do.

A cow that has to use her energy warning the ice cold water she drinks can't use that energy to make milk.

It isn't the total yield, but the yield per unit whether it is per acre, per cow, or per hen, that counts.

A bee is said to travel 43,776 miles to gather one pound of honey consisting of 29,184 drops of nectar. Those who do not believe it are invited by the bee to count the drops.

Mutton and wool are crops for the poorer land that require little labor and bring good returns. Perhaps that explains why so many New York farmers are enrolling this winter for the new free correspondence course in sheep and wool production from the state agricultural college at Ithaca.

Some people never find time to accept good advice. They are too busy handing it out.
