SHOES

I often rise to air my views upon the ill of modern shoes, so slim and tight they call out groans from all our metatarsal bones, and on high heels I sling a jawful, for their effects are something awful. The maid that in such footwear goes will have knock knees and pigeon toes. In olden days no one would know it, but in our time the dresses show it. No longer man is blindly betting, for he can see just what he's getting. He asks no maid to share his roof who is not sound in back and hoof. The wise old aborigines, the Mohawks and the Chippewas, had better kinds of shoes than these. The naked native on the Ganges takes better care of his phalanges. We're civilized in high and low points, in everything except our toes. But these so twisted in their sockets are full of corns and curves and pockets. When I was young in winter weather we wore high boots of good cow leather. They were stiff, and, for to ease them, "most every week we had to grease them, they all had shiny copes and lots of room for feet and hose. Tho these lace shoes now much in use may have more style, they are a nuisance. When lace ends break, between my lips, I moisten them, then twist the tips. They don't taste good, at least not very; I'm sure they are not sanitary.

I'd give three loud exultant hoots if I might still wear red topped boots, or walk once more in congress gaiters, those good old time elastic platers. To get them on you needs must swear and brace yourself against a chair, but, conquered once, they kept their places and had no loosely dragging laces.
—BOB ADAMS.

is the sea
salty?

—because it has no outlet and salt does not evaporate. Therefore all the salt in the sediment which rivers have carried down from the land, remains in the sea water. Vast quantities of
