Cal Overlooks Ruth—A World of Mystery We Need Airships—A Human Bluebottle—Sodom Found

President Coolidge advises American women to vote, and interest themselves seriously in politics, and in maintaining our form of government.

Good advice. Luckily our form of government will maintain itself. And women are more and more taking an interest in politics.

Mr. Coolidge might say a few words to the men, millions of whom, presently, will forget all about the oil scandal, and everything else, because of their deep interest in Babe Ruth's home runs and similar important matters.

Out in the ocean, off Cape Race, is a gigantic iceberg, more than a mile long, towering a hundred feet in the air. To bump into it would mean destruction to any ship. In old days men would have said, "Let us pray that no unfortunate ship will strike that fearful iceberg."

Praying is good, especially when accompanied by deeds. Now this Government sends the revenue cutter Modoc, to trail along beside that iceberg as it moves slowly and majestically to its melting place near the equator. And as the big iceberg moves, the little cutter broadcasts warnings, telling ships to keep away. That's a sign of civilization.

Mr. Le Boutillier is president of the Long Island Railroad. Nevertheless, a rude Government seized his private car, stocked with choice liquors, and threatens to seize and sell the car.

This is a world of mysteries. We send messages by electricity, and we don't know what electricity is—only what it does. We send radio music and messages through the air without wires and say it goes through the "ether." We cannot even prove that it EXISTS.

Now Dr. Banting, a brilliant young scientist who discovered insulin, cure for diabetes, says that having discovered it, he is doing his best now to find out what it is. One thing is sure, it is an expensive product.

AUTO LAW HAS TEETH IN IT

(Continued From First Page.)

recommended that the Legislature "attack the highways problems immediately and in a comprehensive way," and again, during the last session, he sent another special message to the Legislature on the subject; held conferences with leaders of both houses and officials of the New York State Automobile Association relative to conditions and with some minor variations, this law practically carries out Gov. Smith's recommendations.

All other previous administrations and Up-state members of the Legislature, especially have persistently refused to consider the necessity for such regulation. Up-state members of the Legislature have hitherto opposed all suggestions to regulate the younger ones in rural communities, taking the short-sighted view that the cost of a dollar each year for each member of a farmer's family for an operator's license would prove a financial hardship and losing sight of the greater safety which such regulation would create for these same boys and girls on the highways whether in the rural communities or the congested centers.

The organized motorists, then, more than 100 units of the State Automobile Association, represent, as they do, the highest class of citizenship in each respective community, have, in effect, if not in so many words, served notice on sundry officials et al., that these new regulations are not going to be placed in the joke column, nor is this law to be made a political football to be kicked about at will.

Herbert W. Baker, Secretary of the New York State Automobile Association said today: "By unanimous resolution, the New York State Automobile Association composed of more than 100 local units from Buffalo to Albany and from Odgensburg to New York City, has dedicated itself to the rigid enforcement of this law. Assurances of support will be given the Commissioner of Motor Vehicles and his force; local authorities and the state police in the enforcement of this law, and public sentiment will be created throughout the state, not only to support and co-operate in the rigid enforcement of this law, but to insist that it be enforced to the letter."

This new law will prove a veritable buzz-saw to reckless and incompetent automobile drivers, chronic violators and disciples of monkey-work and trickery. Some of these gentry will gasp for breath when they feel the effect of its teeth. But it will undoubtedly have the support of every good citizen of the state.

This law creates a Commissioner of Motor Vehicles with authority to appoint, direct and control three deputy commissioners and as many inspectors and deputy inspectors as may be necessary to carry out the provisions of the law.

After October 1st, no person will

Pure insulin, enough to make a nice little pile on a twenty-five cent piece, would cost half a million dollars.

Pacifists and those who favor the League of Nations please read. The British House of Commons has just been informed that Japan is building 36 fighting craft, 13 of them submarines.

Japan goes ahead quietly with determination and intelligence. And she knows enough to build SUBMARINES. For what purpose do you suppose she is building them? Not to take the Mikado for a little trip, certainly.

The future war will be by submarines and flying machines. And this country should have plenty of both. More than any other nation. We can't afford it. They CAN'T. So much the better for peace.

The learned M. G. Kyle, on behalf of the Kenia Theological Seminary of Missouri, has carefully and scientifically explored that part of Palestine around the Lower Dead Sea, and announces discovery of the location of Sodom and Gomorrah.

Some graves there date back to Abraham. The discovery should fully confirm the Biblical story of the destruction of Sodom and Gomorrah, says Mr. Kyle.

First it's the jaw bone of the missing link. You're told the gorilla is your cousin. Then comes proof of Sodom and Gomorrah, and you are comforted and so is the gorilla.

In the Sing Sing death house, where murderers are kept, lives Mrs. Annie Buzzi, convicted of killing a man named Schneider. She has appendicitis, so a first-class surgeon will operate on her, and endeavor to save her life for the electric chair.

That reminds you of the little boy scolding his sister for killing a big bluebottle fly. He wanted to kill the fly himself.

If Mrs. Buzzi had killed no one and were living at home she might die of appendicitis forty times, for all great New York State would care. But when she's sentenced to death it's different. She must not spoil that plan.

additional state troopers authorized in another measure; the co-operation and support of local authorities and communities, the streets and highways of the state will be an appreciable safer means of business, comfort and pleasure for the rapidly increasing volume of traffic.

ASSESSORS' NOTICE

ANNUAL MEETING OF THE HILLSIDE CEMETERY ASSOCIATION

The annual meeting of the members of the Hillside Cemetery Association, for the purpose of electing directors and the transaction of such other business as may properly come before the meeting, will be held at the office of Snyder & Clark, Thursday, May 8, 1924, at 2 o'clock P. M. All lot owners of the Hillside Cemetery are requested to be present.

FRANK S. CLARK,
Secretary.

Habcock Theatre, Wellsville, N. Y., Sunday, Monday and Tuesday, May 11th, 12th and 13th, Mary Pickford in "ROSITA." Special matinees for this picture at 2:30 P. M. Evenings at 7 and 9. Admission 15c and 5c.

Will the Sun Rise Tomorrow?

The Niagara Falls Power Company sells electricity at the lowest average price received by any generating system on the North American Continent.

A great poet once suggested that the world might end tonight. It might. But the probabilities are that it won't and that the sun will rise tomorrow. And until the sun stops lifting moisture from the sea and the winds no longer blow clouds over the Great Lakes, Niagara power will be ceaselessly available to man.

There is something vastly impressive about a service so relentlessly dependable. The stars in their courses and the elemental forces of nature work for you in Niagara power. The coal fields will be exhausted some day and all the oil wells will dry up.

But when that day comes water will still be roaring endlessly over the Falls and Niagara power will be the same dependable, untiring servant of mankind that it is today.
