By Arthur Brisbane

MARS WILL TEACH US. HOPE FOR THE HOPELESS. ONE GOOD DEED. THE GREAT DERBY.

Sending photographs by wire is at last perfectly successful. This will mean more to the education of this earth than we can realize now. Merely gratifying curiosity or capturing criminals by telephotography on this little planet isn't the important thing.

What can be done on wires can be done through the ether that separates this earth from other planets in our family. We shall get from these planets radio portraits showing faces of their strange inhabitants and radio "blue prints" from Mars showing us how to dig canals to store the waters of the oceans when frost, rain and siltation make this earth perfectly round, leaving no natural cavities to hold the water.

If the earth were absolutely round, as it will be in a few million years, the ocean would cover it about a mile deep. To prevent that, Mars, tens of millions of years older than Earth, will reach us by radio.

If that sounds preposterous remember that you would have said twenty years ago if you had been told that a preacher in Chicago some day would be heard in Los Angeles and Newfoundland in the same second.

Republican gentlemen that tried to "frame up" Senator Wheeler, as corrupt, detestable once in a while "frame" a victim when they need a scapegoat, are in trouble. Men in Montana who thought that copper should control the State, and the men in Washington who thought oil should control the Nation, both disliked Wheeler and decided to put him in jail. They will wish before the thing is over that they hadn't made that attempt. It wasn't a good time for it, although it has doubtless often been done before. Here's hope for the hopeless, the victims of hay fever, Mr. Coolidge, who has a "rose cold," sits for forty-five minutes in an air-tight room, breathing in air mixed with chlorine gas, he leaves saying "the trouble is gone."

Chlorine gas cures colds in men and epizootic in horses. Why should it not cure, or at least relieve, hay fever that tortures thousands for weeks every year? When European nations decided to take what money they could get from China after the Boxer uprising, the United States got some of the indemnity cash, and then realized that it was international blackmail. The money was sent back to China to be used for education. China now thanks the United States Minister, saying that other nations have followed our example. "So shines a good deed in a naughty world."

The Dutch Reformed Church of South Africa opposes prohibition, saying: "Vine is the gift of God which no one should desecrate." That church takes seriously the Bible statement that the founder of Christianity, by a miracle turned water into wine, to make a wedding more cheerful. Some American preachers say the wine thus produced was non-alcoholic. But is it likely that wedding guests would have considered that a miracle worth while?

The Senate Committee of Agriculture rejected the Ford 10 to 6. That isn't final, but it shows how difficult it is to get anything through in Washington sometimes. It isn't quite so difficult if there is a "little black bag" with the right kind of lining in the office.

Wall Street men will discover that Secretary Mellon who had no trouble in cutting hundreds of millions off the national expenditures, will easily find a way to finance the soldiers' bonus.

Tens of thousands gather at Louisville, Kentucky, all excited, eager, speculating, betting on "the great American Derby." The winning horse will get \$50,000. For half the money that a good jockey earns in a week you can buy an automobile that will run any ten race horses to death every day and never get tired. Speed in horses no longer means anything useful. Racing, betting, horse excitement will continue, for it takes men a long time to get over anything they have been doing for a thousand years.

WANT ADVERTISING WILL BE USEFUL TO YOU in your campaign to find the buyer who OUGHT to own that property you want to sell—the man who will know that it ought to belong to him as soon as he sees it. Yes—there IS such a man!

The people who would buy what you would like to sell—or who would sell what you'd like to buy—are, of course, readers of the classified ads.

First Bonus

Here it is boys!—the first bonus certificate signed by General Hines, of the Veterans Bureau, following passage of the bill over the President's veto.

Florida Candidate

Mrs. W. S. Jennings, of Jacksonville, Fla., a strong candidate for the Presidency of the General Federation of Women's Clubs.

Brutally Murdered

Robert Frank, 14 year old son of wealthy Chicago jeweler, who was kidnapped and brutally murdered before ransom could be paid. A reward of \$10,000 is offered.

Poem by Uncle John

COMES NOW, the glad "Vacation-time" so happened and real. . . Seduction is her favorite crime, though she delights to steal—She baits us with an art sublime—restless in appeal. . . She baits us from her abode fern—From haunts of rose and fern. . . She calls from Bad-hurst-by-the-sea, or, Bass Creek at its turn—and when she casts her lure at me, she reckons I am her'n!

So—out from Mammon's fierce demands, my weary soul would fare. . . You'll see me spittin' on my hands—my golf-ball in the air—sweet maid—yer uncle understands—Gwendolyn, I'll be there!

Plain, Ordinary Water

A commonplace combination of two of the commonest elements in the universe—just H₂O—plain, ordinary water!

Yet out of water grew life itself, and without water life could not exist. In all history national greatness has depended upon the intelligent use of water. Rivers made the first civilizations possible. The might of ancient Egypt and Babylonia was based on skill in irrigation. Sea-power has made and broken empires.

Today water-power resources are among the greatest of a nation's assets, although we are only at the threshold of the marvelous development of hydro-electric engineering. In ever-increasing measure the welfare of millions of people living in New York State depends upon the efficiency and economy with which its water power resources are utilized.

The Niagara Falls Power Company sells electricity at the lowest average price received by any generating system on the North American Continent.
