## OF INTEREST TO FARMERS

### NOW LIST MONTHLY— HIGHEST 10 HERDS

Average Figures for Milk and But-  
ter Fat Production Summarized  
by State College at Ithaca

Of the ten high herds in butter  
fat and milk production of the dairy  
improvement associations of the state  
for January, Tompkins county boasts  
four, Monroe county four, and  
Chautauqua and Saratoga counties  
each one.

This tabulation of the ten high  
herds is a new one now being made  
each month by G. W. Talbot, Jr.,  
supervisor of the association of the  
state. The table is made by aver-  
aging the production for all of the  
cows in milk in a herd and thus  
getting the herd average.

In Tompkins county, G. H. Lind-  
say's herd of twelve cows averaged  
839 pounds of milk and 41.3 pounds  
of butter fat, J. C. Joiner's herd of  
nine cows averaged 1020.2 pounds  
of milk and 41 pounds of fat; H. L.  
Hanford's herd of six cows averaged  
918.4 pounds of milk and 38.9  
pounds of fat; R. H. Pratt's herd  
of fourteen cows averaged 1035  
pounds of milk and 37.5 pounds of  
fat.

The four herds in Monroe county  
averaged as follows: Summitt Farms  
herd of four cows averaged 959.4  
pounds of milk and 50.6 pounds of  
fat; H. Nelson's herd of nine cows  
averaged 991.6 pounds of milk and  
38.2 pounds of fat; Charles Bauch  
& Sons' herd of eight cows averaged  
1132 pounds of milk and 37.5 pounds  
of fat; R. Covell's herd of nine cows  
averaged 1093.3 pounds of milk and  
37.4 pounds of fat.

Whitney Dean, the Chautauqua  
county representative, had a herd of  
seven cows averaging 1060.4 pounds  
of milk and 40.6 pounds of fat.  
William Deyoe of Saratoga county  
had a herd of sixteen cows averag-  
ing 1137.5 pounds of milk and 39.5  
pounds of fat.

All of these figures are confined  
to cows in milk and under test.

**HOE  
HANDLE  
HOMILIES**  
(By Bob Adams)

Raw carrots, fed to cow or bossy.  
Will keep their coats both smooth  
and glossy.  
They act the same upon the curls  
Of either long or bob-haired girls.

Carrot seeds are very small. Do  
not bury them too deeply. Half an  
inch is the maximum, less in heavy  
soils. Some gardeners get a good  
stand by laying boards along the  
row to keep the soil moist until the  
seedlings break through.  
Some folks let their carrots grow  
too long. Carrots should be used  
when they are young and innocent—  
before they get old and tough.

Like all root crops, carrots should  
have a rich soil with plenty of mois-  
ture. When well started, however,  
they will stand some tribulation.  
Chantenay and Danvers are stand-  
ard sorts.

**Homespun Yarn**  
Hear the chorus, loud it's sung  
Milk's a food for old and young

Aunt Ada's axioms: Keeping well  
is a lot more satisfactory than just  
getting well.

Rhubarb may be a lowly vegetable  
but it can brighten up the spring  
menu wonderfully.

Nature's bending places are the  
hip joints and the knees. When wash-  
ing and scrubbing keep this in mind,  
and plan the height of your table  
and sink so it is not necessary to  
stoop.

Do you know how much sugar is  
required for different jellies? That's  
only one thing you can learn in the  
jelly bulletin published by the state  
college at Ithaca. A new edition has  
just been issued. Ask for H 114 if  
you'd like a copy.

The most widely read writers in  
this town are the writers of the  
store ads. And it speaks for the  
stores that this is so.

**FOOD~**

The wholesomeness, the variety, the econ-  
omy of your daily food is safeguarded by a  
building material—Portland Cement.  
Farm structures that protect from vermin  
and disease, grain elevators and cold storage  
plants that prevent waste, highways and  
railroads that speed transportation—these  
are made permanent through Portland  
Cement, the cheapest of all products under-  
going a complete process of manufacture.  
Your building material dealer knows the  
many uses, many advantages of Atlas.  
Consult him on your building plans.

PORTLAND CEMENT**

### THERE'S REASON IF RED CLOVER FAILS

Loss of Lime and Fertility Blamed  
for its Failure on Farms Which  
Formerly Grew it Well.

Like the old grey mare that "ain't  
what she used to be", the fields on  
some farms that used to grow red  
clover well, today fail to produce a  
good crop.

There's a reason—this reason, is a  
loss of lime and of fertility from  
the soil.

The most important factor in the  
loss of lime, or the development of  
the so-called "lime requirement" or  
soil "acidity" is that lime and similar  
materials are being removed in the  
drainage of water.

In carefully conducted tests one  
soil lost lime and magnesia equiva-  
lent to 486 pounds, and another 745  
pounds, of pure limestone, to the  
acre.

In these tests, the drainage is  
better than on the average farm, and  
therefore the loss is probably some-  
what higher than may be expected  
in the ordinary field. In field tests  
for acidity, we have found an aver-  
age loss of about 500 pounds to the  
acre a year, and this will require  
one ton of limestone every four  
years in order to make up this loss.

Calcium, the active, useful element  
in any form of lime, is absolutely  
necessary for plant growth. Some  
plants, like clover and alfalfa, use  
more calcium than do such others  
as oats and timothy.

### Agriographs

Plenty of silage and good legume hay  
Helps us to keep high feed bills  
away.

The toad is one of the best friends  
the farmer can have.

Feed perennial plants from which  
you expect to get blossoms.

Don't look on the compost heap as  
a waste space, keep it growing larger

Uncle Ab says the only fellow who  
never stumbled is one who was never  
anxious to get any where.

Blueberries are so good more  
folks might raise them. The state  
college at Ithaca has a circular tell-  
ing how.

A little bit every day in the garden  
is better than temporary neglect  
with later struggles to cultivate it  
and keep down the weeds.

Plenty of shade should be pro-  
vided for growing chicks. When al-  
lowed to range in an orchard or corn  
field they will not only find ample  
shade and green feed, but will bene-  
fit the trees or corn, by destroying  
bugs and worms.

A simple way to give apple sauce  
a new dress is to add several candy  
cinnamon balls such as the children  
buy.—This not only adds a pleasing  
flavor but colors the sauce a fine  
pink.

Water-glass for preserving eggs  
should be used in the proportion of  
one part water-glass to nine parts of  
water. The eggs should be clean  
smooth and infertile; the container  
a clean earthenware crock.

Do you know how much sugar is  
required for different jellies? That's  
only one thing you can learn in the  
jelly bulletin published by the state  
college at Ithaca. A new edition has  
just been issued. Ask for H 114 if  
you'd like a copy.

The most widely read writers in  
this town are the writers of the  
store ads. And it speaks for the  
stores that this is so.

### CITATION FOR PROBATE OF WILL

The People of the State of New York  
By the Grace of God, Free and  
Independent.

To Catherine Will, John Will,  
Kate Snyder (named in will as  
"Schneider"), Ann Folsing (named  
in will as "Volsing"), Henry Will  
(also known as Heinrich Will),  
Henry Will, Lizzie Burdick, Augus-  
ta Will, heirs at law and next kin  
of Wilhelm Will send GREETING:  
Whereas Charles E. Burdick, who  
resides at Andover, N. Y., has lately  
applied to the Surrogate's Court of

our County of Allegany, to have a  
certain instrument in writing relat-  
ing to both real and personal prop-  
erty, duly proved as the last Will  
and Testament of Wilhelm Will,  
who was at the time of his death a  
resident of Andover, N. Y. deceased.  
Therefore, you and each of you  
are cited to show cause before the  
Surrogate's Court of our County of  
Allegany, at the Surrogate's Office  
in the Village of Belmont, N. Y.,  
on the 13th day of June, 1924, at  
ten o'clock in the forenoon of that  
day, why the said Will and Testa-  
ment should not be admitted to pro-  
bate as a will of real and personal

property.  
IN TESTIMONY WHEREOF, we  
have caused the Seal of the Surro-  
gate's Court of the said County of  
Allegany to be hereunto affixed.  
WITNESS, Hon. Bernard B. Ac-  
kerman, Surrogate of said County,  
at Belmont, N. Y., this 7th day of  
May in the year of our Lord, one  
thousand nine hundred and twenty-  
four.  
LEON A. ACKERMAN,  
Clerk of the Surrogate's Court.  
NOTE:—This citation is served to  
give you Legal Notice of the pro-  
ceeding; but you are not obliged to  
appear unless you desire to do so. 25

## Automobile Laws Plainly Told~

### Do Not Fail To Do These Things Before You Start Driving

It will not pay you to try to "beat the law"—and ig-  
norance of the law will not excuse you.

Before you start to drive, be sure that you have ob-  
tained the proper licenses and that your car is properly  
registered in accordance with the Bill of Sale Law.

See that license plates are placed on the front and rear  
of car in such a way that both are plainly visible. The  
rear tag must be illuminated at night by the rear light. The  
law requires that a white light shall be displayed on each  
side of an automobile in front and that a red light shall be  
displayed on the rear. Be sure you have the proper  
lights—burned out lamps make you liable to arrest.

Be sure you have the proper license cards on your  
person at all times while driving.

As an extra precaution always.

USE  
CARCONE  
E.N.I.  
Mobiloil  
AND  
METRO GAS

### SHIRTS Clothes For The Home Run Season

Some far-sighted economist has figured  
out that baseball and our many other sum-  
mer sports give the American nation a  
chance to vest its surplus energy. He terms  
it the "national safety valve."

And here are the Clothes that help men  
dress the part. Fabrics, colors, styles all  
unite with comfort — and do it in a quality  
way — at an economical price. We can  
prove the point — if you'll see these Suits.

**\$30 \$35**
