

THE GREATEST BUSINESS IN THE WORLD

That's how the world regards farming today. Last forever is the old disregard for the farmer and his work—in its place is a new interest in the men who every year take millions of new wealth out of the soil for the whole nation's benefit.

Everything else depends upon the farmer. When his income gains prosperity spreads all down the line.

In the fact that so many farmers count this bank as an extremely helpful friend, always ready to serve them, we find cause for satisfaction.

Your account is invited—
and our broad means of
helpfulness are at your
disposal.

The Prevention of Goitre

The observation has recently been made that in localities where goitre prevails, there is a deficiency of iodine in the drinking water. Water normally contains a small percentage of this metal, and where it is below normal, goitre seems to develop.

This is said to be the case especially in the state of Michigan. That state has met the situation by passing a law requiring that all salt sold in the state shall contain a specified percentage of iodine. In Western New York the water is below normal in its iodine content and goitre is very common. The remedy lies in more iodine.

This may be had in table salt which can be purchased in local grocery stores. It looks and tastes like any salt, the amount of iodine being too small to affect it in these respects. All persons are advised to use it. The cost is very little higher than ordinary salt.

We are writing Fire Insurance in strong Old Line Companies, as we have been doing for over twenty-five years, without a dissatisfied customer during the period.

To supply the needs of some who prefer Mutual Fire Insurance, and have previously had it written out of town, we have taken the agency of some very strong mutual companies. We have one mutual company with more assets than twenty companies such as are being peddled in Andover by out of town agencies.

We can write your insurance at the very lowest possible cost and give you protection as good as the best.
