Over-stuffed Furniture

WHEN you are buying over-stuffed furniture—an upholstered davenport or chair, you may be greatly attracted by the material with which it is covered—but don't be misled!

The real value in over-stuffed furniture is in its hidden, unseen construction. The webbing must be securely nailed and must be thoroughly tied into the springs. And the stuffing must be thoroughly anchored at close intervals so it won't become lumpy and uneven.

Of course you want an attractive covering too—but you can rely on our reputation and our standards for the sound workmanship of the hidden construction of over-stuffed furniture.
