Open Every Night Except Tuesday and Friday

The cold mornings again remind us that summer is past and winter will soon be here.

We wish to request all gas consumers to see that their appliances for using gas are cleaned out and properly adjusted so that the maximum amount of heat will be produced with the least amount

the maximum amount of mean war and a specific solution of gas.

Our supply of gas during the coming winter will undoubtedly be limited so if each consumer is careful not to waste any gas the other consumers will have more to use.

During the WINTER MONTHS please do not use gas in furnaces which are not especially built for that purpose, because even though a coal furnace has a gas rips in it or is equipped with a good burner, the gas cannot be used as efficiently in it as in a garden used in the second of the second part of the second part

good burner, the gas cannot be deed recovered by the tast in a six and therefore waste funderable and that is needed for cooking, etc.

Each year our supply of NATURAL GAS is becoming less and more coulty and when it is gone it will never come back again.

Therefore "USE NATURAL CAS BUT DO NOT WASTE IT is the sleptan adopted by the NATURAL GAS ASSOCIATION OF AMERICA.
