## Even newlyweds can afford these SERVANTS

OR 1 cent to 3 cents an hour, electricity will wash or iron or sweep -do all the household drudgery that makes so many young brides old before their time.

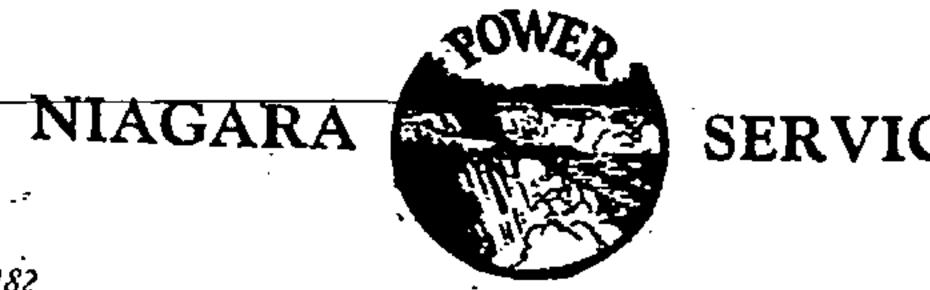

Even newlyweds can afford these electrical servants. They cost far less than the least-trained maid. They work for years without a single afternoon out. They offer a way for the young housewife to keep young, alert, attractive.

The inter-connected power plants of the Buffalo, Niagara and Eastern Power System help to make it possible for electric service to come to you at the lowest possible cost. While the price of most necessities has advanced nearly 100% since 1915, the cost of electric current has actually decreased during the same period.

And so, your electricity is cheap. It is the biggest bargain you buy. Use it freely.
