"If There is Not a Way, Cut a Way."

Back to School

mpatiently, some with regret and others gladly. way for women to wear their hair, and they will doubtface it with despair because it means the end of happy, come carefree days of vacation, when responsibilities were

father to dislike his "daily grind," or the mother her ioned. daily routine of house work.

sibility as any adult shoulders. There is the require- America today? ment to be punctual and the need for having lessons that keep children on the alert all during the school!

This is true, even the school routine is not as up it goes slow. monotonous as it once was. It has been the constant [effort of school executives to take from school as much of the dullness as possible and to make it interesting, and appealing to imaginative minds.

Consider, for example, the much greater variety of courses that are taught and the different teaching a crop this fall. Every agency interested in the wel- one cup of grated horse-radish, two tional Law of the State of modern school deals with health. Every day the teach-1 er is endeavoring to inculcate health habits in her

She is urging them by demonstration and by instruction, to brush their teeth regularly, to wash their, hands before they eat, to bathe frequently, to drink) plenty of water, to eat the right food and, in general. to practice personal hygiene.

tion and when just readin', writin' and 'rithmetic were steps are not taken this fall to prevent it. the only things regarded as really essential. Of course, the new ways will not be as fruitful abundance of seed corn from the present crop. There of results as they might be without home co-operation. This is needed to put to practical use the sensible hygiene children are taught in school.

Good News For Farmer

CIENTISTS at Chicago University, according to, press dispatches, are somewhat worried over what thoroly upon the plants in the field. The loss in vigor. is going to become of the United States in the year however, which comes from short immaturity at 2000. One of them is quoted as saying that we will time the seed is picked is unimportant compared with then have 325 millions of people in the country, pack- the loss that may result from using seed of an uned like sardines. Water power is not being properly adapted variety obtained in the spring from some disutilized, it is declared, soil is being wasted and sewage tant source seed corn picked about three weeks after dumped into our rivers, forests destroyed and rivers of pollination and dried carefully will germinate. oil wasted.

picture. Maybe our country will have that many peo-lafter silking and tasseling is not recommended. a lot of wide and open spaces in America. And the from ears with kernels that are well dented. situation is not perhaps as serious as it looks. Neces-1 sity is generally the mother of invention, and it is like-1 ly as they become acute.

the first word of real cheer to the farmer. When the ing to have to produce some real food to feed the eigner might not understand is why we loaf on Labor hungry masses. Prices will go up and maybe land in Day the Middle West will sell at \$300 an acre again. There seems to be hope in the future, therefore, for the poor that the next 73 years are going to be the hardest.

A Great Institution

MOVIES and the automobile are blamed largely for skirts if they want to. undermining of the once great American home institution of bread making.

up the car and went to the picture show, the baker make us all light headed. came into his own, according to Henry Stude, presi-1 lent of the American Bakers' Association. Better quality bread that the baker was enabled bad liquor and rocking row boats so far this year have to make had little to do with breaking the ordinary the toadstool season to go thru with yet. housewife of bread making," declared Mr. Stude.

"Neither did the convenience of buying bakery bread have a particularly marked bearing. The silver screen ting ahead. and the automobile did the trick." Eighty per cent. of the white bread used in the

nation's 23,000,000 homes is the product of the scien-important you are. tific baker, it is estimated. The 20 per cent. of home managers who bake their own bread are to be found mainly in the agricultural sections and the foreign set-cept an aviator in mid ocean. tlements of the metropolitan cities.

thing, not only for mother but for the whole family. where a golf course is concerned. Rhapsodies on the bread mother used to make were founded more on sentiment than merit. Scientific control and standardization of bread making, as the modern baker knows it, would never be possible in the home. White bread of today is not like that of a de-1 and the nutritive value of bakery bread has been notably supplemented.

Things might be worse. If the world doesn't know you're in it, you'll not be bothered with demands for contributions to this, that and the other thing.
