The lower cow is also a good milker. Same breed and age, freshened same month, had same feed and care. Her December profits

THE profit test began January 1st and continued six months. The cows were on an equal basis in everything except that the upper cow received Dr. Hess Improved Stock Tonic and the lower cow did not. In the six months the Tonic cow made a profit, over and above feed cost, of \$164.09, or an average of \$27.30

The non-Tonic cow made a profit of \$76.20, an average of \$12.70 a month. Butter fat average 2.9%. The Tonic cow showed a record of sustained production, and more than doubled the profits of the non-
