It Is Up To Mankind

IVI they ever undertook to do, except that of evolving a recipt for making people live to be one hundred Along this line, however, the scientists have agreed that they do not believe that the future will take care |

Problems of eugenics, workshop conditions, hycited as objects first to be overcome before such a re- from the test. cipe can be established.

healthy life of 100 years, according to a famous | scientist. He points out, however, that only three in duce the span of life.

The average life in the past 40 to 57 years has been raised from 47 to 57 years. It has been establife, so that man himself, without iron-clad, regulation recipes, can either live a short or a long life.

More Forests Are Needed

MERICA, one time a densely wooded country, and A over which our forefathers probably issued a few curse words as they cleared away the timber, is now preparing an excursion to Europe to study problems of replacing our forests.

Timber and forests in the United States disappear rapidly each year, and only a very small effort has been; made to re-forest and rebuild that which nature had an examination paper a good grade and another mark intended to add to the beauty and comforts of man-

life, are going from this country in June on a mission to obtain ideas along those lines with the leaders in The tour represents a step to bring conservation-,

ists of the two continents together in a cause, which will probably not be appreciated by our generation, but by the generations to come. In Indiana the state department of conservation has taken an active part in pointing the way and setting an example of refreshing hillsides. The State of Indiana owns a large farm in Brown county which NNOUNCEMENT has been made that the time

Children And Candy

day will serve as a great monument for the state.

CIVIC clubs and organizations and schools are constantly at work attempting to do something for has brought ruin to many business enterprises. children who do not have available all of the necessi-cluding manfacturers, farmers and merchants. ties of an average child.

dernourished and underprivileged children, and the two to see even wilder and boarder jumps. must not be confused. A child who does not have the proper nourish-

dernourished children, declares that they often develop him a troubled venture for the 38 years in married an abnormal craving for candy. A plate of candy life, until an x-ray discovered the cause, placed before a roomful of children has been used to demonstrate which type of youngsters were most eager! for the sweets.

ren eat as much as they should until they are eleven survive in these hectic days. or twelve years old. If they are not urged to .take! enough wholesome food, they develop a craving for candy, which relieves their need for nourishment temporarily, but does not build up their bodies

All Aboard For Venus

The rocket affair with which he expects to com- cersary article. Put one quart of of eric conditions that exist only a few miles from the repidly without sirring earth's surface.

While scientists have their view points, the ordinary layman also wonders. Going at such a rapid rate the steam finish the cooking. This will have a long wait for his return-provided. of course, he even leaves the earth.

afte: looking over the gigantic rocket that the starting '

School Exams Are Scored

COLLEGE professor comes out with the announce-A ment that school teachers may be as badly off in kept in the ice box or warmed over grading examination papers as the scholars are in answering the questions. He asserts that a survey has giene, care of babies and a hundred other things of been made which reveals a test of school teachers on direct interest to a vast majority of people have been grading, and that a wide difference of opinion resulted summer are well established. Prints
