He recognizes the changed economic conditions created by the war which require proper protection to industry and to the workers against the competition foreign labor, reduced to standards of living impossible

In other words, there is no question of a tariff f revenue only; none of a revenue tariff with merely incidental protection; and he stands for a real protection imposed by the new conditions... At the same time he is not pledged to any schedules that shelter extortion or are the result of favoritism or that make for monopoly. And he would extent the principle of protection to the farmer, who just now needs it most,

The swimmer entered the lake on a side which was not "private," and he paddled himself into the forbidden section, but as his feet did not touch the bottom of the lake, the court held he had as much right there as anyone.

The world today is full of instances of trespassers, especially in our social life. Probably they, too, are like the swimmer in the lake. They are not guilty unless their feet touch the ground.

to save 5¢ A WEEK

A NY woman who washes clothes by hand is trading her very youth for about five cents a week.

Today the electric washing machine does a big washing in less than two hours . . . keeps dainty hands soft and white ... gives leisure to devote to the children. And it costs but a penny an hour to run.

That's because interconnected power plants of the Niagara Power System supply electric service where and when it is needed, at the lowest possible cost. Generating apenses have been reduced to a minimum. Operating costs have been lowered. All these savings are reflected in your monthly bill.

Niagara Power Service actually costs less today than in 1914. You can afford to use it freely. See your nearest electrical dealer.
