

Courage and Character

George
Washington

To George Washington the nation pays tribute once again. It is fitting that we recall the sterling qualities of this man of destiny who so ably led a badly equipped and poorly trained army to victory. No crisis ever demanded more versatile ability and knowledge than that of 1776. And it is to the courage and the true character of Washington that the United States owes its very existence. Aggressive in the very face of defeat, Washington's courage carried on. Today in the nation's need of courage we add our tribute to Washington and the character for which he stands.

This bank will be closed all day Wednesday, February 22nd, in honor of Washington's Birthday.

A man who belonged to his country has passed—Calvin Coolidge. Former Presidents always belong to America in common. Politics does not alter ownership. Mr. Coolidge was ours.

Scientific physicians may well ponder on death that comes before it ought to be due; Mr. Coolidge was too young to have died. But, there was a mighty insistent CAUSE, which physicians should be alert to discover. I cannot believe that the distinguished patient was not warned in plenty of time to have averted the tragedy.

Was it tobacco? My own experience contradicts that verdict. I am 71 and I have smoked excessively, I feel sure, but not with any menacing symptoms. Was it indolent habits and over-eating? Some say it was "acute indigestion." I don't believe acute indigestion alone ever killed anybody. Thousands—millions of children have it—relieved by simple evacuating the digestive canal.

If Mr. Coolidge died of genuine heart disease, it must have been a blocking of the coronary arteries—due for the most part to influenza—maybe an attack of mild severity, years ago. Such a thing could be, I admit. But the patient would have been warned in plenty of time by insidious, creeping attacks of short

breath on exertion. I have never contacted a case that was not—and I have seen many.

I lost two aged people with acute influenza last week. One past 80, the other 70. It is one of the most virile poisons known—and not well-known at that.

It was more likely a case of over-indulgence in highly-seasoned food that disrupted an artery of the brain that took Mr. Coolidge; one does not have to be a glutton to die of such a condition. He was temperate. I wonder if he ate his chief meal at 6 o'clock?
