ANDOVER TO PLAY ANGELICA

On Friday night, March 10, Andover High School's first and second teams will journey to Angelica to play a game which was originally scheduled for Andover but which was moved to Angelica instead.

Earlier in the season Andover played a game in which the final score was tied. As both teams had left the floor it was too late to play the game and it is to be played off Friday night. This year Angelica was second in the Class C League, Section 1, and the game should prove interesting and fast. The second team was defeated by the Angelica second team but they have gained experience and should prove a stubborn foe for Angelica's reserves.

GIRLS' INTERCLASS

BASKETBALL

Coach McLaughlin is considering having interclass basketball teams for the high school and the seventh and eighth grades. If enough girls show their intention of playing, six good class teams ought to be turned out. There are no eligibility rules and one need not have had any previous experience playing basketball to participate. The games will probably be held directly after school on certain days. Any girl who wishes to join a class team sign up with Miss McLaughlin.

RESULTS OF CAMPAIGN

The campaign for selling Curtis magazines came to an end last Friday, March 3. Unfortunately this campaign was not as successful as any of those the high school had sponsored previously. A total of 14 subscriptions were sold and as it is impossible to lose money on a subscription campaign, a small profit was made for the Athletic Association. The two teams, headed by Fay Brown and Florence Mulholland with their assistants, were tied in the number of subscriptions sold.

HISTORY OF ALLEGANY COUNTY

Maxine Crandall

Chapter II.—Noted People

Mary Jemison was the first white woman to set foot on the land where Allegany county stands today. She was captured by the Senecas and was later adopted into their tribe. She was twice married, both times to Indians. She was granted a tract of land from the government. There is a statue in her honor at Letchworth Park.

Robert Morris was born in Lancashire, England. He was a prominent leader in the Revolutionary War. He at one time owned all of Western New York, Allegany county was in this land.

Ashael Cole was one of the noted journalists of this county and an early settler. Nathaniel Dike, an early settler from Connecticut, William C. Kenyon was founder and president of Alfred University. He was followed by Johnathan Allen. Boothe C. Davis is at present the president of Alfred. Hon. Martin Grover was a noted statesman and served one term in Congress.

James Baxter was the founder of Baxter Institute of Music. Philip Welch was a humorist and author. Madam Albert of Alfred, the daughter of President Allen, advanced student in art and speaking. Some women who were prominent temperance leaders were Mrs. Barker, Mrs. Rude, Mrs. Bradley and Mrs. Mary Willard.

The first settler of Independence was John Cryder, who settled there in 1778. His name was preserved by naming the place where he lived the Cryder or Cryder's Creek.

Hotel Clerk: "I beg your pardon but what is your name?"

Charlie L.: "Name? Can't you see my name there on the register?"

Clerk: "I do, that is what aroused my curiosity."

Hobo: "Lady, I really do not know where my next meal is coming from."

Lady: "Well, this is no information bureau."

MUSIC DEPARTMENT

A Thrill

Last week another writer asked you to watch this space for further thrills and surprises, about the new kind of musical entertainment being prepared for you by our music director.

I am going to do a follow-up of "an exposed secret" by giving you a thrill, at least, I hope you will thrill at the thought of your sons and daughters taking part in this new operetta, "Count and the Co-Ed."

Get below the surface and forget that those who will entertain you in a few weeks are your own, and your neighbor's children still going to school. Close your eyes and let imagination carry you to a Metropolitan setting. A luxurious theatre—soft lights, beautifully gowned women, perfectly attired men, and you, in the midst of all this.

House lights are dimmed—the footlights go up—the conductor raises his baton, thus, the thrill of the overture. A pause for a second, the curtain raising to the accompaniment of subdued music which gradually dies away. And then—the entrance of perhaps your own child grown to manhood or womanhood, or the son or daughter of a neighbor.

You sit entranced. The performer has finished and is bowing in response to the applause and acclaim of a sophisticated audience. You are remembering that years ago, in a high school auditorium, you sat and watched the first efforts of this now famous person. You will be grateful that you had a part in encouraging and fostering their talent.

This is not idle dreaming. Read the early news of nearly all of our famous singers, musicians and performers. Won't you patronize our operetta when it is produced? Even if none of our music department acquires fame, we are getting a better understanding of one of the Great Arts—Music!

The Purpose and Value of the Operetta Project

There is no finer opportunity taught in the whole school curriculum than is team work. Our athletic activities teach a highly developed technique of team work to a comparatively small number, but do not give that opportunity to a large body except by observation from the side lines.

If the individual in the operetta, whether in the chorus or in the cast, can learn to become a member of a union action and can subjugate his own personality for the effect of the whole, then the operetta definitely establishes itself as a desirable part of the school activity. The operetta will not need a champion. It will speak for itself and an observant public will sense its value at once.

The operetta is an added feature to music study. It may awaken in the non-participating student a desire for that activity which is but a forerunner for further study in music.

The operetta is also an impetus to the participants for they naturally want to advance to better parts or do better work where they are. There is always the feeling that "next year I'll be the lead," and that feeling is valuable under skillful guidance, for therein lies the opportunity of teaching sportsmanship as well as music.

The community interest in an operetta is often in proportion to the number taking part. The more there are on the stage, the more there will be in the audience. And the more in the audience, the greater will be the community backing, not only for the operetta, but for the music plan as a unit. Community interest may be so thoroughly aroused as to make a desire for adult participation in music activities.

—M. M. Lynch

FACULTY NEWS

Miss Leo was shopping in Olean Saturday.

Mrs. Schwarzenbach spent the week-end in Wellsville.

Miss Jordan was a guest of Miss Trenkle at Miss Trenkle's home in Portville, Sunday evening.

Mr. Perrone, Miss Kelley and Mary Mopice Lynch called on Mr. Lynch at Hornell, Sunday.

Prin. and Mrs. Hardy spent Sunday in Belmont.

Bill Brown was driving along the road at a fast pace, when his car struck a rough place and turned over. Escaping without injury Bill went to the nearest farm house and phoned to a garage:

"Hello," he said, "I've turned turtle. Can you send someone out to help me?"

There was an interval of silence. Then, "I'm afraid not," replied a boyish voice over the phone. "I guess you ain't got the right number. What you want is the zoo."

ANDOVER HIGH DEFEATS CANISTEO ACADEMY

IN FAST GAME

Last Friday night, March 3rd, the Andover High School basketball team handed Canisteo Academy its first defeat of the season when they defeated the academy team by a score of 28-20.

Canisteo started the scoring when Buckley made good on two shots from the foul line. Brundage started the Andover scoring when he tied the game up with a long shot. Alderson made two long shots to put Andover out in the lead and they were never headed again. During the first quarter Andover scored nine points while Canisteo was scoring four.

In the second quarter Andover used a number of substitutes and Canisteo outscored Andover for the only time during the game. The half score was Andover 13, Canisteo 9.

In the third quarter Andover again outscored Canisteo, this time by only one point as they made five points to Canisteo's four. The score at the end of the third quarter was Andover 21, Canisteo 16.

During the last quarter the academy team could not seem to find the basket, making only one basket until just before the final whistle when Kittell made a long shot. The Andover team had more luck and they made seven points and made the final score read Andover 28, Canisteo 20.

ANDOVER SIX LOSES TO CANISTEO, SCORE 33-24

The Canisteo Academy girls' team downed Andover Friday, March 3rd on the local court by a score of 33-24.

The invaders held a comfortable lead during the first quarter. Canisteo staged a rally that produced ten points while Andover was held to five. The second quarter furnished little excitement. Canisteo was able to sink six baskets to Andover's one foul shot, making the score at the end of the half 22-6.

The half opened with a bang. Both teams fighting harder than ever. During this time Canisteo did a great deal of substituting. The Canisteo girls were successful in scoring eleven points while the Andover girls scored nine which made the score 33-15 at the end of the third quarter.

As the fourth period started the Andover forwards found the basket and rapidly made the margin less decisive. Canisteo did not score during this quarter. The game ended with the score 33-24.

Dean contributed 15 points to her team's total. The line-up:

Andover Girls	field	foul	ttl.
Stocum, f	3	0	6
Church, f	0	0	0
Parker, f	1	1	3
Dean, c	6	3	15

Fredricks, g	0	0	0
Totals	16	1	33

Referee: V. Taylor.
Scorer: D. Oakes.

Miss Clifford wrote 92.7 on the blackboard, and to show the effect of multiplying by ten, rubbed out the decimal point. "Now, James," she said, "where is the decimal point?"

"On the eraser," replied James without hesitation.

Milton was wandering homeward much later than his usual supper time one evening when he met a friend of the family:

Friend: "Why, Milton, aren't you likely to be late for supper?"

Milton: "None. I got the meat."

THE SPY

This is station A.H.S. broadcasting. This is your friend the Spy speaking. For the next 15 minutes I will entertain you with news flashes from gossip around the studio.

We sure are going to have some operetta. Eddie Brewster and Dorothy Oakes are going to be good when they get together in this.

All of the hearts of our girls went a-flutter last week when that Wellsville boy visited school. He renewed his old acquaintance with Charlie and Charlie was delighted to see him again.

The big subscription campaign ended all tied up. Each team had seven subscriptions—not bad for 120 students!

I hear that Dec understood that May was in Hornell so he took Florence Parker over to see Maynard play against Belfast.

And Ruth F. still continues her flirtation with "Red-Ed." I wonder where she got those snappy socks she was wearing last week.

Bill's hair ain't gettin' a bit curly as she grows out. Bill's just beside himself. "Little nanner oil, Bill."

Lee Rogers seems to be back after her old boy friend again. It's too bad, because Fay and Helen make such a good pair.

Jack Regan sure roughs it up in interclass basketball. He got some fouls called on him Tuesday night. Can you feature that???

Signing off from the old bull-pen (your study hall).

THE SPY

INTERCLASS LEAGUE IS ORGANIZED

Last week Mr. Perrone organized an Interclass League. It is made up of teams from the eighth grade, Freshmen, Sophomores, Juniors and Seniors. Owing to lack of players in some classes players were drafted from the eighth grade which had too many players in proportion to other teams. Only persons who have not taken part in varsity games are eligible to play.

Scores last Friday:
Fresh 14, Soph 23.
Seniors 17, Juniors 15.
Scores last Tuesday, Mar. 7:
Soph 28, Juniors 9.
Eighth Grade 23, Seniors 2.

Standings:			
Sophs	2	0	1,000
Eighth Grade	1	0	1,000
Seniors	1	1	.500
Juniors	0	2	.000
Fresh	0	1	.000

High scorers:
D. Clarke, Soph., 21 points.
R. Scott, Soph., 14 points.
D. Lynch, Soph., 10 points.
D. Joyce, Fresh, 8 points.
B. McGill, 8th grade, 8 points.
B. Dugan, 7 points.
H. Alvord, 6 points.
K. Vars, 6 points.

Don Joyce: "Mother, I dreamed I was on a boat and I fell into the sea. Need I wash this morning?"

THE CRAZE

In my leisure as I stroll down the street, I carefully gaze at the people I meet. Nearly all have a box, which dearly they hug:

And I say to myself "Just another bug!"

Each is hurrying on his way. Mindless of work or time of day. Of all these people I'm sure to find That each of them has but one thought in mind.

If I should chance to stop and have speech, Their language is clearly beyond my reach; Instead of talking depression or politics, They say "I did this in two and this in six."

As time goes by, things get worse, Soon everyone will need a nurse; For no longer their healthy color they keep, But are thin and haggard from lack of sleep.

Do you know now of what I write? Maybe you don't—but then you might, If you can't guess then I'll explain: The Jig-saw Puzzle is all to blame!

People work for hours to complete these things, And just notice the satisfaction it brings, Then they destroy it, swap it or maybe borrow, A new Jig-saw to work tomorrow.

—F.E.C.

Save tears by peeling onions under water.

THINGS WORTH KNOWING

The arms of an orang-utan are so long that when one of these apes stands erect its hands hang at its ankles.

Tornadoes almost always move from southwest to northeast. A giant toad has been observed to catch 128 flies in less than half an hour.

The search for varieties of alfalfa that will resist wilt and that can be grown in the United States has carried crop specialists as far afield as Africa.

Toronto has a hospital for gold-fish.

Accidents occurring at home cost the lives of 24,000 people in this country last year.

Dynamite, one of the most important of peace time explosives, is made by dissolving gun cotton in nitroglycerin.

It is estimated that the blindness in the world could be reduced by half in the course of a generation, if intensive scientific effort were given to the problem.

WHAT A GIRL IN HER TEEN SHOULD DO FOR GOOD HEALTH

By AMELIA H. GRANT, M.A., R.N.
Director, Bureau of Nursing
New York City Department of Health

HOW TO HAVE GOOD TEETH

THE secret of healthful and beautiful teeth lies in proper diet and proper care. Unless you eat the right foods you cannot expect to have pretty teeth or to be free of toothache and other dental troubles.

The teeth, like the bones, are made principally of minerals, especially calcium and phosphorus, which must be taken into the body with the food.

The substances necessary for bones and teeth are all contained, in various combinations, in fresh green vegetables, in fruits and cereals, and especially in milk and dairy products. A quart of milk a day, taken either as a beverage or in foods that are cooked with milk, will give you an adequate supply of calcium and phosphorus. You should always take at least one large glass of milk at every meal for your general health and for the good of your teeth.

You should brush your teeth morning and night and after each meal. Any good tooth powder or paste will do, for all any dentifrice can do is clean the teeth.

Visit your dentist at least once every six months, he will check decay and keep little troubles from growing into big ones.

SONG of SALES

SOMEbody once defined architecture as frozen music. The building of an advertisement is, in a manner of speaking, an architecture of ideas, using three basic materials: words, pictures and space. . . . The art of composing an ad consists in employing all three materials in harmony, building up to a crescendo in sales. . . . You've got the idea to sell, we have the space and the pictures. Let's get together as a band and compose some ads that sing! Phone 242 and we will bring proof sheets of cuts and layouts.
