Italy's Air Armada

ENERAL ITALO BALBO, air minister of Italy, has the geographical location, the character of the country usuccessfully led his air armada of 24 sea planes surrounding, the shipping facilities, the natural advanacross the vast expanses of the Atlantic and brought it tages? down at Chicago at the roint of the Century of Progress Exposition.

This feat of massed flying marks one of the most stupendous accomplishments of aviation to date. One ence of a common bond which causes business and so-winters in cracks in the bark and in hundred intrepid birdmen in 25 planes set out on the cial enemies to put aside all differences when it comes bud scales. When the foliage comes historic trail of 6,100 miles from their homeland, and to boosting the town. No town ever made real prothe under surface of the leaves. The 24 of them were successful in arriving in perfect con-gress in the way to substantial success without the get-irritation from the feeding causes dition and formation. Only one accident marred the together spirit unanimously adopted. It has rejuven- the leaf tissue to develop the abnorentire feat when one plain capsized at Amsterdam on ated old hulks of towns that were yawning their way mal swellings or galls within which the first stop of the flight. One man was drowned and into endless sleep. It has infused new life blood into the mites live and continue to feed. three injured.

end. The statistics of the flight will bear this out as Natural advantages count for much and prosperity buds open in the spring, with soluthe planes left Italy on June 30 and did not arrive in cannot be built upon shifting sand, but any town with the rate of one gallon to 15 gallons Chicago until July 15; altho the actual flying time was half a chance can be made to grow and expand and of water. This kills the over-winonly 47½ hours. General Balbo refused to take any thrive when its citizens join with one accord in the tered mites before they have the A stupendous welcome was accorded the flyers on

their arrival at the exposition grounds, as was true at every stop they made on their journey. Six interme-imiles an hour on a strange road: diary rests were made in all.

The flight was epochal in itself since it is a feat that establishes history. But it has a much moré important meaning than the mere novel characteristics. It is an outstanding example of scientific, systematic chances on the weather and would have completed the men's feet are getting bigger and also better. have been accomplished but the element of risk would go together. have been multiplied. General Balbo was responsible for the lives of one hundred men who started the jour averages from five to seven. Not so long ago the aver- Jersey, according to C. E. F.
