

FULL STEAM AHEAD

THE storm has been weathered. The sky is clearing. Trade winds blow fair and the nation is back on the course, full steam ahead, for the port of full recovery. . . . It is now time for a material expression of full confidence in the captain on the bridge. That means to resume normal buying, to put money to work, to cease hoarding, to enjoy a full life of normal comforts and, to express confidence by helping to make business better. . . . In our business of banking, we feel that we can serve you in an efficient manner. We solicit your patronage.

Paint Now

Maybe you have been thinking that you will put off that paint job for another year. Money is tight, the future uncertain, and it is so easy to make excuses.

Let's look at the other side of the picture: In the first place the building is sorely in need of protection; it hasn't been painted in six or seven years; this weather is made to order for a good paint job, hot and so dry that there are no wet spots to show up and push the paint off later on. The labor may be figured at just about one-half normal cost and the paint is lower in price than for many years—so you see the good reasons for painting now far over balance those that make for delay.

Moore's Paint was never quite so elastic and capable of large covering capacity; the colors more beautiful or thoroughly ground into the pigment or the whole mass so tempered as to flow from the brush more easily. In fact, every element is most favorable for a first quality job at low cost.

Let us figure it all out for you.

A Tinder Box

Fairly describes present conditions as regards fire hazard; unusual care in handling all combustibles is essential to avoid conflagrations that endanger life and consume property.

Many fires spring from the flying head of a common match or carelessly dropping those still glowing during hot dry seasons why not play safe by using only Safety Matches.

The so-called parlor match is dangerous to have around. Mice and children plus matches have rendered many people homeless. Safety matches that ignite only on the box are cheap and convenient; a package of 12 boxes is priced at 7 cents or 3 for 20 cents.

A Definition

"Daddy, what is a conference?"
"It is a meeting to decide where the next meeting is to be held."

Hot Water

Something that makes for comfort and cleanliness when properly applied; also a term used to express a state of discomfort for the fellow who has been injudicious in the ordering of his conduct.

But we are talking about the kind of hot water that comes thru pipes to sinks, bath tubs and such like. We sell water heaters that are made with cast iron circulating chambers inside a steel jacket and mounted above a natural gas burner of the latest and most approved efficiency.

By actual test this type of heater is more durable—will deliver more water at any desired temperature for less fuel expense than the coil of other designs of water heaters.

For new or replacements let us show you the advantages of Augmore Cast Disc Heaters and quote you the low prices.

In One Assembly

The new Segal Safety Razor, nothing to get out of place or out of order, uses double-edge blades. Users are delighted with its novelty as well as its splendid shaving qualities.

School Days

Just around the corner and will be here almost before you are aware. Our stock of School Supplies covers all grades or departments, a wide range of selection and much better than usual values.

Get the habit of dropping into our place for your needs in this line and save money.

No one matches our 2 for 5 cent line of Lead Pencils, the usual nickel seller is no better.

New Shoes?

Again so soon? The children go thru them very fast, but we have found a good way to make all footwear last longer.

Watch the breaks and fix at once with So-Lo, a plastic that may be applied with the fingers, a wood padle or an old case knife.

So-Lo is self-vulcanizing and long wearing, a 25 cent tube will do wonders.
