# The Modern Tasks of Hercules

The ancient Greeks honored the strength and power of Labor in the legends of Hercules and his twelve tasks. Roughly parallel to, and not less herculean than, those legendary labors are the preeminent achievements of modern Labor. In a true sense, we are all members of that vast body of workers for the good of humanity. We therefore compliment ourselves, this day, for the great works of transportation, communication, agriculture and those industries and activities which clothe, feed, shelter, amuse and educate all of us.

This year we have an additional accomplishment to honor. It has been a difficult task, to work thru a world-wide economic break-down. Yet, by our cohesive power, our spirit of hearty cooperation, our unusual acknowledgement of educal blame and our freedom from the panicky fear that has characterized previous depressions, we are enabled to win thru to the point where, now, we can see a brighter littude at hand.

It is these intangible attributes of character which outdo the merely physical feets of the ancient Hercules. It is the Will of Labor we horior today.
