BAKERS' STORE NEWS

Cool Evenings Are Here

You can take that chill—from the room in a few minutes with an Electric Heater.

Locate them where the heat is most needed and the cost of buying one or running one for an evening is small compared to the comfort obtained.

Rain and Slush

The yearly supply of moisture in this section is always about the same. We have long dry spells and then the heavens open and even things.

Roofing is a problem that is always with us, both new and repairing eternal vigilance is the penalty a stitch in time proposition if you would have roof protection at reasonable cost.

We maintain a complete roof service, paint, cement, prepared material felt or metal. Our customers are using it every day, you better join in and get every thing ship shape while the work may be done comfortably—its a mighty cold fingered job in December and on.

Silver Ghost

A name given to an Automobile with a certified record of having traveled 368,000 miles; it was one of the entries at the Veteran Car Trials held in England in 1932.

The winner in this contest was a 9 h. p. car that had been driven every year since 1894; another of the entries was the first automobile owned in Plymouth, England, a four horsepower Benz, belonging to a doctor, this car was built in 1901, and still going.

All of which proves that with care and intelligent lubrication, no one yet knows how far a car may be driven. Take no chances. Tixid is an oil that you can depend upon. Keep a can in easy reach and be sure to change as needed and maintain level in crank case.

Two gallon sealed cans \$1.00, tax paid. If you are not using Tixid you are either losing money or wasting it.

Casco Glue

For that unusual job when others fail.

Aviation asked for a better glue. Casco was the answer.

In packages at 10 cents and up.

Under the Paint

The real value of a paint job cannot be measured by its appliance, its action under the brush or its covering capacity; does your paint just veil the surface or does it completely seal it against all action by the elements, particularly sun and rain.

Paint made from mineral spirits or wood oil, thickened with a calcite or gypsum product and colored to please the eye may conceal, but it is a false face—beneath the surface the elements are going right on with their rotting job, in fact operating a little more rapidly for these insidious bugs of decay work faster when out of sight.

The only secret of making good paint is the free use of those materials that years of testing has proven to be the best possible protection, they are perfectly corroded lead and zinc, washed free of all acids, then ground in right proportion with strictly pure linseed oil. This gives you the best values in paint known to the most honest paint makers of today and it is the formula under which Moores Pure Linseed Oil Paint is made.

Improved methods, improved machinery great care in proportion and certain laboratory kinks which are carefully guarded secrets, are Moore's claim to a paint product that is the highest standard of value. We offer it to you with full confidence that in no other manner can you employ your paint dollar to better advantage.

Our prices are the lowest consistent with the quality and service you receive when you give us your business.

Trust Your Labels

Yale Lock - Diastion Saws - Eagle Files - Moores Paints - Mazda Lamps and many other items we might name have won their place by always being strictly dependable and giving utmost value, their labels spell confidence—we try to keep our service on the same level.
