MISS ANNETTE CLIFFORD

### FACULTY OF 1933-34

The following comprises the faculty of Andover High School for the year 1933-34, together with the school they graduated from:

Robert B. Hardy, principal, Cornell.

Wallace Clarke, science, Alfred.

Harold Huffcutt, science and mathematics, Alfred.

Gretchen Trenkle, language, Syracuse.

Annette Clifford, English and commercial, Alfred.

Mildred Farnen, commercial, University of Rochester.

Catherine Joyce, history, English and commercial, Villa Marie.

Mary Jo Russ, music, Fredonia.

Margaret Kelley, Eighth Grade, Geneseo.

Edith Paine, Seventh, Geneseo.

Ruth Baker, Sixth, Geneseo.

Ruby Jordan, Fifth, Geneseo.

Harriett Schwarzenbach, Fourth, Geneseo.

Margaret Beeman, Third, Geneseo.

Dorothy McLaughlin, Second, Geneseo.

Marie Alvord, First, Fredonia.

### MUSIC, FROM THE FRESHMAN POINT OF VIEW

Ask us what music is? We will tell you. We, the Freshman, as small as we may seem to the rest of you, we can do our part. We are more than willing to co-operate with our Music Department and Miss Russ to make this department bigger and better, both in the orchestra, Glee Clubs and other musical enterprises. You can't call us good for nothing and lazy, even though we are Freshmen. We can stand up for our own rights and we're certain that our musical instructor can count on us to do our part. We know enough to appreciate a good opportunity and do all that is asked of us, for the betterment of our dear old school. So, if you want to know the first thing, also the last, about music, ask us!

I understand that Miss Russ has a new class song for us.

Come, Freshmen, let's show the upper classmen our musical ability.

—Jean Millsbaugh.

### FOOTBALL DANCE

On Saturday evening, Sept. 23rd, a benefit dance for the football team will be held in the High School gymnasium.

The team is badly in need of equipment, and every cent made on the dance will go to that purpose. Mr. Huffcutt, who is arranging the music, has assured us that a good orchestra will be on hand and the music will be everything desired.

The dance will start at about 9 o'clock and the admission price will be only 50 cents a couple. Most everyone can afford this so let's all turn out and help the football team earn new equipment.

### SENIOR BAKE SALE

The annual campaign of the Senior Class to raise money for a trip will be inaugurated on Saturday, when this year's Senior Class will hold a food and bake sale in the vacant store next to the Horan hardware.

Last year the Seniors made money enough to spend a week at Silver Lake and this year's class would like to do the same. Thus when you buy your baked goods next Saturday, please patronize the Seniors. The sale will start at 10 o'clock.

### GIRLS' GLEE CLUB ORGANIZES

The organization of the Girls' Glee Club was effected on Monday after school, when all those interested in the girls' Glee Club work met in the study hall under the supervision of Miss Russ. The list of officers is:

Helen Pope, president.

Leah Oakes, vice president.

Edna Joyce, secretary-treasurer.

Florence Mulholland, reporter.

### ORCHESTRA MEMBERS SECURE ORCHESTRA PINS

During the Commencement exercises of last year the orchestra members secured orchestra pins. To secure a pin one must be eligible and attend orchestra rehearsals very faithfully.

Look for our orchestra members with their good looking pins, and Andover High School beaming all over.

### MR. PERRONE UNABLE TO RETURN—GIVEN LEAVE OF ABSENCE

Due to illness, Mr. Perrone, our popular science and mathematics teacher for the past five years was unable to return to his duties on September 5th and the Board of Education therefore gave him a leave of absence for the first semester. At the close of school last year Mr. Perrone was given a contract for this year, which he accepted and his return to work was expected. However, in his place the Board of Education has hired Harold Huffcutt and Wallace Clarke.

Mr. Perrone is very popular with the students and was very instrumental in the organization of this paper, the Hi Herald. He has coached football, basketball and track and has had good success considering the material he was afforded. Likewise, his capability is shown by the fact that two teachers were necessary to take his place.

Mr. Perrone will certainly be missed this first semester and the entire student body wishes for his welfare and speedy recovery to health.

### ANDOVER OPENS FOOTBALL SEASON AT ALLEGANY

About Twenty Men to Make the Trip Saturday—Hope to Have a Victory.

About 20 men will make the trip to Allegany Saturday when Andover High School opens its 1933 football season with that school as its first game.

Coach "Wally" Clarke has not announced his starting lineup for the game, but it is expected Baker and Padden will be at the ends; Brewster and Briggs, tackles; Brown and Edwards, guards; and Joyce or Ingraham, center. The backfield, composed of Church as quarterback, Don Brundage and Malc Brundage halves and Clarke fullback, is expected to be the one starting, with a possibility of Joyce or Sly replacing Don Brundage at the halfback position, due to a bad leg of Brundage's that refuses to come around into shape. However, it is certain that it will take more than a bad leg to keep Brundage out of the game entirely.

Other men who will probably see action include Sweet, a guard or tackle; Ray Briggs, guard and McAndrew and Yannie, ends.

A large group of fans is expected to accompany the team to Allegany in hopes of seeing Andover open the season with a win.

### MUSIC DEPARTMENT

Our enlarged registration means a larger Music Department this year. Our orchestra is somewhat larger. The newly elected officers will be announced later. Then, too, we anticipate a much better Glee Club, both boys' and girls'. The Glee Clubs are to be re-organized very soon.

During the year we hope to put on some very fine showings under the direction of our music director, Miss Mary Jo Russ. It is up to the music students to co-operate with Miss Russ in all of the plans for the coming year. This, with the patronage of our citizens, we shall be able to put on an operetta and a concert. Also, our orchestra and Glee Clubs look forward to take part in two music festivals and to appear in other public events.

So let us, who are interested in making the Music Department of our school the best yet, do our part by putting it on top.

### PEOPLE, ATTENTION, PLEASE!

Of course you all know the situation of our orchestra, know that it is large and doing excellent work. There are many other pupils in our school who wish to play in the orchestra, but cannot afford or do not have an instrument to do so. Therefore, if there are any persons in town who have or know others who have any instruments lying around their homes with no one using them, why not put them to work by renting or selling them to members of the Music Department who wish to learn to play an instrument, and become a member of the orchestra?

Townpeople, you would be doing so much if you would help us out in such a manner. You may be assured that your property will be given the best of care, and at the same time it would mean giving other pupils an opportunity to participate in the high school orchestra.

### ORCHESTRA MEETING

At a recent meeting of the orchestra, the following members were elected to hold the offices for the coming year:

Malcolm Brundage, president.

Werner Cook, vice president.

Francis Vickers, librarian.

Leah M. Oakes, treasurer.

A human being's body contains about 600 muscles.

### SCHOOL REGISTRATION IN ANDOVER HIGH

The registration report up to date shows that the number of students in high school has increased over 30, while the grades show a slight decrease as compared to last year's report. As a whole the student body has increased.

The latest report is as follows:

Post Graduates	13
Seniors	19
Juniors	27
Sophomores	35
Freshmen	56
High School total	150
Eighth Grade	24
Seventh Grade	33
Sixth Grade	19
Fifth Grade	30
Fourth Grade	30
Third Grade	20
Second Grade	29
First Grade	33

Grades, total	218
High School, total	150
Total registration	368

### A. H. S. HAS GOOD OUTLOOK OF SUCCESSFUL FOOTBALL SEASON

With nine lettermen back, including Baker, Padden, Brewster, Briggs, Brown, Joyce, Church, Brundage and Clarke, and with a wealth of material with which to plug the hole in the line left by the graduation of Mulholland and Lever, all indications point to one of the most successful seasons in the history of football at Andover.

Coach "Wally" Clarke has several likely prospects for the center and guard positions, including Sweet, grumpy Freshman, and Edwards, a bulky and powerful candidate for the guard post, while both Ingraham and Joyce look good at the center position.

McAndrew shows real promise of developing into an excellent wingman and will probably see plenty of service at this post this year. Sly and Don Brundage are making a strong bid for backfield positions, and Brundage will probably see regular service at the halfback position.

A fast line backed by a speedy backfield will be the finished product of the labor of Coaches Greene, Huffcutt and Clarke. Greene had charge of the line, while Huffcutt drills the backs and Clarke is now head coach.

Brewster, hefty tackle and Briggs his lightweight mate, have showed up well in practice and should be able to stop many a rush thru the line, as will Will Brown who hits like a ton of brick.

Andover faces its first test at Allegany, Saturday, with games continuing until Thanksgiving, tentative games to be with Canisteo, Portville, Cuba, Greigsville, Wayland and Wellsville. Bolivar is also on Andover's schedule.

### SENIOR CLASS ELECTS OFFICERS

Ruth Farwell to Head Class For Coming Year. Girls Hold all Offices.

At a meeting of the Senior Class on September 12th, over which Miss Farnen presided, the following were elected for the coming year:

Ruth E. Farwell, president.

Helen L. Vickers, vice president.

Margaret C. Powers, secretary.

Helen L. Pope, treasurer.

### HUMOR

Doctor: "See here, I told you to stick to a vegetable diet, and you're eating rabbit!"

Decatur Clarke: "It's all right, doc; this rabbit's the one that ate up my vegetable garden last summer."

Mr. Hardy: "Aha! I'm glad to notice that you're arriving punctually now, Max."

Max Baker: "Yes, sir; I've bought a parrot."

Mr. Hardy: "A parrot? What on earth for? I told you to get an alarm clock."

Max: "Yes, I did, but after a day or two I got used to it and it didn't wake me. I got the parrot and now when I go to bed I fix the alarm clock and put the parrot's cage on top of it. What that bird says when the alarm clock goes off would wake up anybody!"

"Twas midnight in the garden,  
Two lips were tightly pressed;  
When father gave the signal,  
The bulldog did the rest!"

"Smile awhile, for when you smile another smiles and soon there are miles and miles of smiles, and life is worth while, because you smile."

Ruth F.: "What is the difference between a wealthy man and my little dog's tail?"

Ethel H.: "What is?"

Ruth: "One keeps a motor car and the other keeps a wagon."

Observation  
Things sure appear to be lean,  
Times worse than we've ever seen;  
But with all the flurry,  
Talk, gabble and worry,  
They continue to buy gasoline.

## Food Market Advice

By ANN PAGE

There is always something new in the produce market which helps to make marketing interesting and meal plans more varied. The new comers this week are cranberries which are unusually low priced, big Idaho potatoes for baking and Canadian rutabaga turnips.

Cranberries, besides good sauce and jelly make a pie which many people enjoy. Idaho potatoes make particularly good baker stuffed potatoes. To prepare this type of potato, after baking cut away the skin scoop out the potato and mash it with hot milk, butter or seasonings. Refill the potato shells and brown in a hot oven. The addition of a generous amount of grated cheese will make potatoes prepared in this fashion a good luncheon dish. Yellow turnips are good served in cubes with butter or cream or mashed. Combined with mashed potato they make excellent turnip-potato cakes for sauteeing.

This also is the season for sweet potatoes. They are good baked, browned in the pan with roasts, candied with or without the addition of fruits, fried or mashed. Mashed sweet potatoes are lighter when combined with part white potato. Sweet potato pudding or pone and sweet potato pie are also good. Make them as you would custard or pie from winter squash which is also coming into market.

Eggplant is inviting in price. If you do not like it fried, try it scalloped or stuffed. Cauliflower is a fall vegetable and is unusually low in price just now. It, too can be cooked in a variety of ways. If it turns brown it has been cooked too long. It should be cooked uncovered in a quantity of salted water until tender. Then it may be served with butter or cream, lemon and butter, Hollandaise or mock Hollandaise sauce. Or it may be scalloped with or without cheese. Cauliflower florets make a good salad which is a change after tomatoes and cucumbers which, however, are still in market.

The outstanding fall fruits, excepting of course apples, which are plentiful, are pears, grapes and Italian plums. These are all good eating fruits and also good for preserving. Small Valencia oranges are a good buy and oranges help to make delicious desserts as well as orange juice. The Quaker Maid Kitchen suggests the following unusual and interesting dessert which calls for oranges:

Neapolitan Orange Dessert—Prepare one package of chocolate pudding according to the directions on the package. When it has cooled slightly, pour into parfait or sherbet glasses until half full. Allow to chill.

Prepare one package of orange gelatin dessert according to directions on the package. Cool, and when partial set, place in a pan of ice and water and beat with an egg beater till stiff and foamy. Heap over the cold chocolate pudding—place in the refrigerator till ready to serve—and garnish with sections of orange.

Although all meats are still reasonable in price attention is called

this week to the forequarter cuts of

beef, lamb, pork and veal. These are distinctly economical cuts, their flavor is good but as a rule they long, gentle cooking to tender them. Stews and braised dishes with their flavorful gravies have a real appeal as cooler days come on. In this class is to be found fowl and a good fricassee with dumplings or a brown chicken pie is an excellent dish.

The summer fish season is approaching its end but the fall and winter season which includes oysters is just beginning. Keep in mind the prospect of cocktails, tews fried and escalloped oysters.

## Agrigraphs

Get the bulbs now for next spring's beauty in the garden.

Uncle Ab says he does not believe that blessings can be brought by ballyhoo.

Remember that frosted pumpkins may be all right in poetry, but they won't keep in the cellar.

These are the days for doing things to doors. Fix them on house, barn, and garage before the blustery winds of winter are here.

Poultry and eggs are produced on more than 5,400,000 farms in the United States, which has about 6,000,000 farms in all states.

## Human Ear Is Keen, But It Misses Many Sounds!

Dog hears sounds to which master is deaf. Latest hearing aid acousticon, (upper right) employs bone conduction principle of transmitting sound impressions to brain. Device even permits smoker (lower left) to hear through his pipe.

YOU may know more than your dog, but when it comes to hearing he's far ahead of you! His big adjustable ears focus on sounds too distant for you to hear and arouse him long before your better brain is able to distinguish between the actually dangerous and the merely strange.

Isn't because you are deafened that you cannot hear as well? Your ears are attuned to a different range of vibrations, by which all sounds are caused. The human ear ordinarily hears sound vibrations of 30 to 30,000 per second, the ability to hear depending upon the efficiency with which the ear structure transmits sound impulses along the auditory nerve to the brain.

Scientists say that most of the estimated 10,000,000 deafened persons in the United States today hear sounds within certain tone or vibration ranges. They may be deaf to sounds within 2,000 to 4,000 vibrations or these sounds may come to them with distortion.

Modern efforts to conquer deafness seek to restore hearing within these distorted or lost ranges of vibration. This is rather an abrupt departure from the older practice of trying to restore hearing by increasing the volume of all sounds, and parallels modern methods of

utilizing corrective lenses rather than magnifying glasses to defective eyes.

An outstanding mechano-electric hearing aid recently demonstrated in New York is called the acousticon. It represents scientific application of the principle of bone conduction of sound and is the culmination of experiments which were begun by Dictograph Company engineers in 1903. Thirty years of laboratory research have enabled them to restore hearing even in cases of 95 per cent deafness by utilizing the auditory nerve rather than other parts of the ear in proportion as the use of that nerve is retained, the engineers say they can restore hearing.

A fixed solenoid hammer in the acousticon, which is less than an inch long, moves a virtually indestructible anvil a bare two-thousandths of an inch, transferring sound vibrations through the bony skull structure to the auditory nerve. Worn on the prominent bone just back of the ear and concealed by the hair, when worn by women the acousticon is set to offset the lack of response in certain tone ranges and compensates for weaknesses in hearing just as lenses overcome defects in vision without otherwise affecting the eyes.

## IN THE GOOD OLD ALKY TIME

NEWS ITEM:—"Urge blending of alcohol with motor gasoline to reduce surplus farm crops."
