OUR KEYNOTE:

"If There is Not A Way, Cut A Way"

What N. R. A. Has Done

FTER only three months, during a period of usual. summer lethargy, the NRA shows this record There has passed one-eighth of the two-year emergency has vastly improved working conditions and raised the and mines. It has brought employers and their workers !" to the same council table for frank discussion of their problems, with a realization that they are mutual, and especially that whatever the nature of the problems, they also concern the consuming public, upon which both management and labor depend.

NRA is actually stopping waste, not only in our business structure, wherein production costs will known to all, but also the waste of our long-neglected natural resources. The NRA program contemplates melting frozen credits and hitherto hard hearts. It bringing back confidence to the extent that people are again buying merchandise with faith in the future in themselves. Nearly two millions have notified relief way to and from school is again an important problem. agencies of their new independence. And NRA has

only covered the first furlong. business men and their customers under the Blue Eagle usual manner when in the congested areas of schools. all determined to bring the country out of the depression, it has promoted a spirit of solidarity, local and their young minds are often times pre-occupied with national, the value of which will be incalculable for thoughts about school and play and they do not exermany years to come. As the President solemnly warn- cise the proper care. Every driver should proceed very ed, "This Nation cannot subsist half boom and half cautiously until the school zone is well passed. broke." This fact the American people have come to pitiful accidents will be averted if this is done. realize to an extent unprecedented and incomparable! in our history. At a time when we were at our lowest ebb, NRA seeks to teach our complete interdependence one upon another. We now know, from the saddest all experience, drawn out over four years of hideous helplessness, that the President's appeal for earnest an continuous co-operation is not to be given in a spirit philanthropy but for our own salvation.

It is much better to remain silent and be classed as one who doesn't know much than to speak up ; remove all doubt.

Time to Act

THERE is now no doubt left as to the outcome of the vote on the 21st amendment which will nullify the to cast their vote in the wet column to make the prohibition law. So far, not a single state has declared itself for the 18th amendment.

Most of the states and congress included have absolutely no provisions at hand to take effect after the prohibition law has been done away with. There is no thought of liquor being sold freely and unrestricted It must be controlled and taxed. But just how it be done remains to be seen.

Now is the time to get busy so that there will be some sort of regulations in effect when the time comes for the need, and that is not far away. If something the wound is not properly protected, inflammation soon north wind changed his breath in isn't done, there will result a period of confusion and results unless the skin is kept clean and free from the autumn to protect the maple. trouble which will be distressing. There will be no germs.

laws prohibiting liquor and no laws permitting it. used as a model for a basis for our own regulations since it is working smoothly in that country. hoped that there will be a rigid control that will no. permit the return of the old-time saloon and its evils. Law making bodies should give serious and immediate consideration to the drafting of the correct laws.

more than once in the same place.

reared for the coming year with no provisions for pay-doing this we are successful in preventing the spread ment of either principal, if due, or of interest. It is incomprehensible how sensible persons can be

duped into taking such an attitude. The deadbeat has ed, and every care should be used not to allow germs always been the scourge of business and for a govern- to attack the mucus membrane in the openings of the ment unit to turn dead-beat itself is the ultimate in body such as the mouth, nose, etc. pure folly.

The same citizens who now advocate defaulting public indebtedness were the same ones who only a few years ago were insisting that more and more public improvements be made. The money was borrowed in good faith to carry out various projects and no N SEPTEMBER 25th, Admiral Richard E. Byrd again in the same fraction of a secmatter how hard it may be to pay it back now, there V headed another expedition into the antarctic. Sev- ond required for the words to echo is only one honest and righteous course to pursue—[enty scientists and adventurers accompanied Byrd on pay back every cent of it.

The public readily accepted any bonds issued by hazards. gevernmental bodies, taking a low rate of interest in It has been revealed that there has been a recest of a second. most instances that the investment might be a safe one. sion of the ice barriers around the pole and that there To repudiate the obligations so conceived is to play the is possibly much new exposed land there. It is the part of the traitor.
