Slight Damage

Miggs: "I hear your wife was driving the car and had an accident. Much damage done?"
Hubby: "No, just a little paint off both."

We have Gas Heaters for just these particular places. They are known as Burn Over Gas Heaters, and they do just that, by a scientific patented interior construction they actually consume all the usual waste products of combustion, burn them over and over as many times as is necessary to their complete consumption.

They are sold on trial, are guaranteed and priced up from \$11.50.

Drip, Drip

When water faucets leak, if you are paying for water, so much per gallon, you quickly put in a new packing and stop the waste.

If the tires on your car flatten out you know they are liable to be damaged, for lack of air pressure so you pump them up again. You can see these conditions and you know the remedy.

If you could see the electric current wasted by cheap or inferior lamps as easily as you see water wasted from dripping faucets you would immediately do something about it, by changing to lamps that you knew were giving you full value.

General Electric Mazda Lamps are not just another electric bulb—they are the product of a long series of very accurate tests to find the shape, filament, and vacuum that would produce the best light and longest service conducive to the most economical use of electricity. They could easily be made to burn more hours but the loss from extra consumption of current would more than offset that economy.

Every G. E. Mazda Lamp is tested, it must measure up to their standard of perfection or it goes into the discard. Look on the end of all your Electric Bulbs, unless they are etched Mazda, G. E., in circle, with the watts and voltage, they are dripping current and causing you useless expense.

We sell genuine G. E. Mazda Lamps, we do not mix inferior or seconds—every one is tested and guaranteed; our prices the lowest. May we have your lamp business, it will pay you in the long run?

Hard Coal Heater

Base burner, ventilating jacket, with magazine and mica doors all around.

A cheerful and efficient heating stove used only a few months; cost \$80.00. Yours for \$32.50.

Liquid Solder

Mends all metals, great for auto radiators. Apply with fingers. A sure repair without heat and now selling for a dime!

By saying little, some people acquire a reputation for knowing much.
